Monarch's "Deep-Heat" Cooker

ELECTRIC

Is
DIFFERENT
because it has

"SIDE HEAT"

IMAGINE yourself sitting INSIDE a circle of hot radiators! You'd soon feel pretty well "cooked." But if you sat DOWN on a radiator, the application of heat would be decidedly concentrated. The same principle applies to Monarch's exclusive side heat cooker. Monarch's side heat actually "wraps" the heat around the food — speeds cooking — tenderizes more thoroughly — and bakes rather than stews. No need to stir — foods do not stick to bottom!

HERE are three dishes you can prepare better and more economically with "Side-Heat," on MONARCH'S Electric Range Model F46P.

They Really Know Pectin!

Commercial preservers must be pectin experts. With millions of glasses at stake, they must know and use the pectin that assures jam and jelly success every time...with greatest economy. Why M.C.P. PECTIN is Preferred!

There must be a good reason for this overwhelming preference for powdered pectin and M.C.P. — and there is. It's because M.C.P. PECTIN has these definite advantages so important to every jam and jelly maker:

It's Colorless, Odorless, Tasteless! Will not alter the fresh, natural color and flavor of fruits and berries, or cause jams and jellies to grow dark on top in time.

It Has A More Effective Pectin Strength! Keeps better... goes farther... does not deteriorate quickly.

Is More Economical! Costs no more, gives more for the money. Jells more fruit and sugar, makes more glasses.
