Mr. and Mrs. Herman Meyers and son Ed and friend Bill Johnson of Seattle were week end visitors at the home of Mr. and Mrs. Percy Northway. Violet Northway returned with them to Seattle for a visit.

Uncle Sam Says

1000 UNITED STATES SAVINGS BOND

500 UNITED STATES SAVINGS BOND

200 UNITED STATES SAVINGS BOND

100 UNITED STATES SAVINGS BOND

50 UNITED STATES SAVINGS BOND

25 UNITED STATES SAVINGS BOND

There are six revered ex-Presidents ready to help send your son or daughter to college. For it is their likenesses which appear on six U. S. Savings Bonds. They are President Abraham Lincoln on the \$1,000 Bond; Woodrow Wilson on the \$500 Bond; Franklin D. Roosevelt on the \$200 Bond; Grover Cleveland on the \$100 Bond; Thomas Jefferson on the \$50 Bond; and George Washington on the \$25 Bond. Any of these Bonds will pay you \$4 for every \$3 invested in ten short years.

Need of Protein
Everybody needs protein every day for building and repairing body tissues. People whose bodies are building tissues rapidly—expectant mothers, nursing mothers, growing children—need to eat more protein feed every day than other members of the family do.

Farm Bulldozer Blade

This bulldozer blade can be attached or removed from a tractor in three minutes. The blade was salvaged from an old road scraper and the pushers are old 1 1/2 inch galvanized irrigation pipe. The U-clips which attach the pushers to the tractor are 1 1/4 or 1/2 inch flat iron which was bent into shape and welded to the pusher pipes. Braces for the frame are 1 1/4 inch pipe.

Tests Disclose Silage Increases Hay Tonnage

Tests of haymaking methods show that considerably more tonnage of feed will be obtained from a meadow crop when it is put in a silo than can be procured by any other method of storing.

Analysis of field cured and mow cured hay and of grass silage show a larger percentage of protein in grass than in similar forage cured either in the field or in the mow.

Plastic Curtains
Plastic curtains clean with a cloth and rain won't hurt them. They can be washed in a machine. Hang them damp and they lose their wrinkles while drying.

New Locomotives
New locomotives installed in service in 1948 by Class 1 railroads totaled 1,407, the greatest number for any year since 1927.

Safety Precaution

To prevent children from locking themselves in a room, seal the top or sides of doors locked with cellophane tape.

Orphan Lambs

An orphan lamb sometimes may be adopted by another ewe, by putting the skin of her dead lamb on the orphan for a few days. In case a foster mother can not be found, the lamb can be raised by hand.

Farm Records

Good farm record books are one of the most important tools on the farm.

"River Horse"

Although the hippopotamus gets its name from the Greek words which mean "river horse," the animal is a relative of the hog—not the horse.

Smut in Wheat

The best way to deal with loose smut in wheat and other grains is to plant seed that is not infected with this disease.

Ringworm in Cattle

Ringworm is one of the most common skin diseases of young cattle and is apt to be most prevalent in the cold months, due to crowding in winter months.

At Ice Show

The alloy steel blades of special skates for figure skating are especially heat-treated for hardness, and are hollow ground on the sides and bottom.

Enemies of Seed Corn

The flat grain beetle, cadelle, almond moth and Indian meal moth are some of the insects particularly destructive to seed corn, because they make their first attack on the germ.

No Job Too Big

To straighten a curve in its track, a railroad recently changed the course of a large river.

Mexican Duck Kill

Annual kill of ducks in Mexico is estimated as less than the take on opening day in the United States.

POINTERS FOR LONG DISTANCE CALLERS

Now you can save money on your cross-country calls—and help us give you still faster service

2. When you place your call, you can save time all around if you give the information to your long distance operator this way: First, the name of town you're calling...then, the number if you know it, or the address. (Good idea to keep a list of the out-of-town numbers you call most frequently.) Next, if it's a person call, give the name of the one you want to talk with. The operator will then ask your name and number.

4. Wise use of the telephone—either local or long distance—helps you get the greatest value from it. And service is constantly growing more valuable. A local call is still just a few pennies. And you can make a daytime station call from coast to coast for only \$2.50, plus tax.

1. Even before you call, you can start getting the most for your money. It's a good idea to make a list of the things you want to talk about. A few handy notes can help make sure you won't think of something you really wanted to say—after you hang up. Experienced long distance users keep paper and pencil at the telephone and make notes while they're talking, too.

3. When you complete your call, be sure to hang up promptly—and properly. If you remember to use these pointers every time you call long distance, you'll be certain of getting the most from your call for the least money. With really efficient use of the telephone, you can pack as many words into a three-minute conversation as you can in a letter—and you'll get an answer to your questions right away.

Your telephone is one of today's biggest bargains.
