'PACKAGED' MILLS process ALL of Every Log — Efficiently

WHEN this company's long-range objective is reached, we will have at each mill site—in one compact package—enough different kinds of mills to use ALL the timber harvest from our tree farms. The advantages are many. First, transportation, administration costs, power, and other costs are reduced. Without such economies it would not be practical to use all the harvest—because in order to win permanent markets, prices must be low enough to attract customers. Integration makes it economically sound to use all the different sizes and species of trees grown on the supporting tree farm. We can also make salable products from formerly unused sound material. Planer shavings, slabs, and short pieces for example—become the raw materials for other nearby mills. This volume creates more jobs for workers. Future stability is greatly improved for employees, shareholders, our communities and allied business.

YOU ARE ALWAYS WELCOME! Weyerhaeuser extends a cordial invitation to the public to visit our mills. Trained guides will gladly show you through. Tours: Morning and afternoon, Monday through Friday. Plants located: In Washington: Everett, Longview, Snoqualmie Falls. In Oregon: Klamath Falls, Springfield.

TO HELP INSURE A PERMANENT INDUSTRY WE—

OPERATE TREE FARMS—to provide a never ending timber supply for our mills. The forest crop is harvested, reseeded, harvested, reseeded—in about 80-year cycles.

DIVERSIFY OUR MANUFACTURING—in order to use all of the tree. The aim is to build manufacturing centers in each of our operating areas so that on one millsite we can make useful products from low value as well as high value material.

DEVELOP NEW PRODUCTS—to increase the "take" from each acre of forest land harvested. A staff of engineers and scientists spend all of their time in this work. More products mean more steady jobs.

DEVELOP PERMANENT MARKETS—to be reasonably certain that Weyerhaeuser products are in steady demand year in and year out, in good times and bad. We work toward consistent high quality, and apply modern selling methods to create customer demand.
