

DELIGHT VALLEY

(Mrs. E. D. Sherrill, reporter
phone 618R4)

In spite of the influx of seed catalogues and hopes of an early spring, Old Man Winter persists in hanging around. But, now that the "Lights came on again, all over the world," thanks to the hard-working and hard-worked repair crews, no apparent damage is being felt because of the continued stormy weather, except perhaps by the teachers and students of the Delight Valley school who have been having more than their share of vacations, but due to a default in the heating system. School was dismissed on Tuesday, January 17 after it was learned that the heating element had "sprung a leak," and school was closed until Friday for the necessary repairs. Tuesday seems to be their bad day for again this week classes had to be dismissed because the system once more failed.

Mrs. Hazel VanNortwick, principal at the school, took advantage of the enforced vacation to doctor a bad cold which had kept her from her desk on Monday. She is much improved and back on the job or will be, if and when, school opens again.

Bill Norris has also been feeling the effects of the bad weather for he had to be absent from his work for a full week due to illness, but he too is back to work now.

Recent visitors at the home of Mr. and Mrs. Glynn Garrison were Mr. and Mrs. Walter Garrison and son, Wayne of Drain and their house guests, Mrs. Helen Wescott and daughter, Marjorie from

Rugs and Furniture with dirty faces . . .

now can be **DURACLEANED** "In Your Home" and restored to natural beauty

No inconvenience for you! Your upholstered furniture, valuable Oriental rugs or tacked down carpets are safely cleaned "right in your home."

The **DURACLEAN** process eliminates strong soaps and chemicals which so often harm the dyes or fabrics. And, there is no wear or loss of pile from scrubbing. This doubly safe method cleans by ABSORPTION. Aerated foam absorbs dirt and grease . . . then holds the grime in suspension until removed. Fabrics dry in a few hours. No shrinkage. Colors revive. Rugs and upholstery stay cleaner longer! **DURACLEAN** is recommended by America's leading furniture and department stores.

You may, at the same time, have your furnishings moth-proofed. **DURAPROOF** kills moths and carpet beetles upon contact. Actually makes fabric resistant to them. One Duraproof treatment lasts 4 YEARS! Also rendered IN YOUR HOME. Phone for Free Estimates. No Obligation.

THE NATION'S TEN OUTSTANDING YOUNG MEN OF 1949

J. Roosevelt III-35

K. S. Pitzer-35

R. L. Floyd-31

J. B. Shepperd-34

C. E. Hastings-35

C. B. Wilkinson-33

Harold Russell-35

F. D. Murphy-33

G. R. Ford-36

C. H. Percy-30

HERE ARE THE NATION'S ten outstanding young men of 1949, all thirty-six years or younger, selected by a panel of ten judges for the United States Junior Chamber of Commerce at Tulsa, Okla. They are: Harold Russell, 35, handless veteran and actor; Gerald R. Ford Jr., 36, U. S. Representative from Michigan and political reformer; Charles H. Percy, 30, business executive; Robert L. Floyd, 31, Mayor of Miami, Fla.; C. B. "Bud" Wilkinson, 33, Oklahoma Univ. football coach; Charles E. Hastings, 35, aeronautics inventor; John B. Shepperd, 34, lawyer; Theodore Roosevelt III, 35, Pennsylvania Secretary of Commerce; Franklin D. Murphy, 33, dean of School of Medicine, Univ. of Kansas; Kenneth Sanborn Pitzer, 35, a U. S. director of atomic research. (Central Press)

Maine, mother and sister of Mrs. Walter Garrison.

Arvid Olson of Ashland, brother of W. Olson arrived on Sunday afternoon to enjoy a visit with his brother and family.

Wm. Schilling had the misfortune to drop the trailer tongue on his foot, cutting the foot badly and breaking a toe, necessitating the placing of a cast on the injured foot. Mr. and Mrs. Schilling and children, formerly of Eastern Oregon, have purchased the Gnos ranch, known more familiarly as the Joe Creek ranch and expect to be moved as soon as the task of redecoration has been completed. They are at present located in Cottage Grove.

Fire is one thing that can create a lot of disturbance as well as distress, but it does have a tendency to bring the neighbors out by the score, even when help is not needed, as the VanNortwicks learned on Monday when they set fire to an old shed that was of no value to them nor the scenic beauties of our fair valley. They do appreciate the consideration and offers of help extended and express their thanks to everyone. It is gratifying to know that in time of need there are willing and helping hands.

Members of the cooking club have had to postpone their meeting again last week because of the illness at the home of their leader, Mrs. Norris, and this week because of the early dismissal of school. However they are progressing nicely and so far have held eight meetings with demonstrations of the lessons presented at each meeting. Mrs. Durlinger and her daughter, Willa, presented the club with a pair of Chef's caps, which are worn during the demonstration by the Chefs of the day, after which they autograph them. These caps are to be presented to Mrs. Norris at the close of the session. The members also are making a scrap-book of their activities, with Elaine Oster and Francis Hite in charge of the book. They have renamed the club, which is now known as the "Sunshine Chefs,"

and from the happy incidents related at each meeting, and the enjoyment derived from the club by all, the name is an appropriate one.

Mr. and Mrs. James Hemenway left for Portland on Tuesday where he will attend a meeting of the Pacific Poultry Producers, of which he is an officiating member.

LYNX HOLLOW

(Mrs. Orville Lamb, reporter)

Having had nearly seven feet of snow in the higher areas of Lynx Hollow, the people are very glad to see the rain that is helping melt the snow, tho it is snowing again at this writing.

There was no school several days last week because of the weather. Jim, George and Ruby visited their mother, Mrs. C. L. Quackenbush Sunday. She has been ill several weeks and will remain in bed for a few more weeks. Mrs. Quackenbush is being cared for at the Walt Lamb Jr. home, while the children stay with their aunt, Mrs. Orville Lamb.

Mrs. John Macauley underwent major surgery at Sacred Heart last week and is reported doing well.

Darrell Lebow started back to school last week after several weeks absence due to illness.

Mrs. Fred Kinsland has been ill but is feeling better now.

Mr. and Mrs. Roy Stalder spent Wednesday with the Ora Addingtons.

Mr. and Mrs. Ora Addington spent Friday with Mr. and Mrs. Joe Owen Jr. in Drain.

Mr. and Mrs. Jim Boyce and Debra, Mr. and Mrs. Boyd Strong and girls of Cottage Grove were Sunday guests of the Lawrence Fisher family.

Grandma Rickard stayed several days at the McCarty home while Mrs. Cook was in the hospital, but fell and injured her hip, so Bobby McCarty is staying with his grandparents in Cottage Grove.

Mr. and Mrs. Joe Owen and Linda of Drain attended church in Cottage Grove Sunday then came on to her parents, the Ora Addingtons for dinner.

Mrs. Sally McCarty spent the week end at home.

Mr. and Mrs. Walt Lamb Jr. visited with friends in Springfield, Sunday.

Hiram L. Cowles Of Drain Dies 19th

Hiram Lovett Cowles, 82, Drain, died January 19 in Eugene. He was born Nov. 2, 1867 in Minnesota, and lived in Drain the past 21 years.

Surviving are his widow, Maude, and several nieces and nephews.

Services were conducted at Drain Church of Christ Saturday at 3 p.m., with the Rev. Frank Brown of Cottage Grove officiating. Private cremation followed. Simon-Lounsbury Mortuary was in charge.

NOTICE TO CREDITORS

NOTICE IS HEREBY GIVEN: That the undersigned has been appointed Executor of the Last Will and Testament of JESSIE VERA COOLEY, Deceased, by the Circuit Court of Lane County, State of Oregon. All persons having claims against said estate are hereby requested to present the same, duly verified, with proper vouchers, to the undersigned at the Law Office of HERBERT W. LOMBARD, Wiser Building, Cottage Grove, Oregon, within six months of the date of the first publication of this notice. Dated and first published January 26, 1950. ROMNEY L. COX, Executor. HERBERT W. LOMBARD, Attorney.

Berry Production Costs Outlined In New Bulletin

A comprehensive study of the costs of producing berries for processing in the Willamette valley has been completed by the O.S.C. agriculture experiment station with the publication of a series of four bulletins outlining study findings.

Conducted by Gustav W. Kuhlman and D. Curtis Mumford, agricultural economists, the studies covered costs of producing strawberries—discussed in bulletin No. 469; boysenberries and Loganberries—No. 470; red raspberries—No. 472; and black raspberries—No. 473. Publications are available free of charge from county agents or from the College.

The cost of producing strawberries for processing in 1947 averaged \$537 per acre or 15.06 cents per pound, the economists found. The average yield was 3,529 pounds per acre.

For boysenberries, it cost an average of \$470 per acre or 11.16 cents per pound for the same year. The average yield per acre was 4,212 pounds.

Loganberry production averaged \$441 per acre or 12 cents per pound with an average yield of 3,674 pounds per acre.

The cost of producing red raspberries averaged \$609 per acre or

12.94 cents per pound with an average yield of 4,705. Black raspberry costs by comparison were \$374 per acre or 15.81 cents per pound with an average yield of 2,195 pounds per acre.

The various factors affecting costs and their relative importance are analyzed by the authors for the benefit of both growers and processors. Individual growers can use the figures as a basis for judging the efficiency of their individual operations and for improving their farming practices. Kuhlman and Mumford point out. The processing industry can use the findings to chart the position of berry growers in varied market situations.

OSC STUDENTS AVAILABLE FOR COMMUNITY MEETING

Oregon State College—Student talent from Oregon State college speech department is now available without charge to neighboring community organizations for programs of practically any desired length.

The types of programs on a wide range of subjects include expository lectures, orations, illustrated talks, forums and discussions, debates, one-act plays, readings, and demonstration of parliamentary procedure, or practically anything in the field of dramatics and forensics. Speeches on special subjects of the organization's choosing can be arranged on a month's notice.

The students, operating under the student platform service, are undertaking this service to gain

experience in appearing before audiences. Some students are ready for immediate engagements but they appreciate as much advance notice as possible.

C. N. Harris, assistant professor of speech, is in charge of the service and "booking" may be made through him.

OSC STUDY OFFERS TIPS ON SMALL PLANE OPERATION

Oregon State College—Recommendations for eliminating most of the excessively high cylinder head temperatures that are generally believed to be the major cause of exhaust valve sticking in light airplane engines are suggested in a new technical bulletin just issued by the Oregon State college engineering experiment station.

The publication is based on test flights and a study made by S. H. Lowy, O.S.C. instructor in aeronautical engineering. The investigation was made at the suggestion of B. F. Ruffner, professor of aeronautical engineering and former chairman of the Oregon state board of aeronautics, who reported considerable difficulty with exhaust valve sticking by light-plane operators, especially in warm weather. This resulted in high maintenance costs.

The new bulletin, No. 27 in the engineering experiment station series, is titled, "Cylinder Head Temperatures in Four Airplanes with Continental A-65 Engines."

You'll find it in the classified. Page 12 and 13.

"what
permanent
markets
mean to us—"

"As forest industry employees, we are vitally interested in permanent markets for the products we make. We know that permanent mill and logging operations depend upon a continuing opportunity to sell these products. To us, permanent markets mean improved job security, steadier payrolls and increased stability of homes and communities."

UNDER our American system of competitive business, buyers enjoy a freedom of product choice available nowhere else in the world. The Weyerhaeuser Timber Company needs to sell lumber, pulp, plywood and by-products continuously on this free market. To do this, we must maintain the quality, competitive price and uninterrupted flow of forest products required by consumer demand.

The operating policies of the company . . . tree farming, different kinds of manufacturing plants located on one site, constant product development and process improvement . . . all play an important part in developing permanent markets.

In addition, the company has a large group of trained forest product salesmen. They apply modern merchandising methods in servicing current customers and making new ones. Technical specialists aid our customers toward better utilization of the products they buy.

Developing permanent markets will mean a continuing business enterprise profitable to all of us—employees, shareholders, government, the company and communities in which we operate.

**WEYERHAEUSER
TIMBER COMPANY**

WORKING IN THE PACIFIC NORTHWEST TO CREATE PRODUCTS, PAYROLLS AND PROFITS

TO HELP INSURE A PERMANENT INDUSTRY WE—

OPERATE TREE FARMS—to provide a never ending timber supply for our mills. The forest crop is harvested, reseeded, harvested, reseeded—in about 80-year cycles.

DIVERSIFY OUR MANUFACTURING—in order to use all of the tree. The aim is to build manufacturing centers in each of our operating areas so that on one millsite we can make useful products from low value as well as high value material.

DEVELOP NEW PRODUCTS—to increase the "take" from each acre of forest land harvested. A staff of engineers and scientists spends all of its time in this work. More products mean more steady jobs.

DEVELOP PERMANENT MARKETS—to be reasonably certain that Weyerhaeuser products are in steady demand year in and year out, in good times and bad. We work toward consistent high quality, and apply modern selling methods to create customer demand.
