Building permanent markets through modern selling

It takes a steady flow of orders to keep our camps and mills running. Successful selling is absolutely necessary if we are to have a permanent forest industry and steady employment.

This is the job of Weyerhaeuser marketing divisions, their salesmen and technical service men. Their job is to study the markets, plan their sales programs, and get the orders at the time our mills need them. Then they see to it that quality and delivery are such that the customer will buy again and again. We advertise our products to make their qualities known and use many other modern means to help win steady customers.

Permanent markets—orders from thousands of regular customers—are the ONLY sources of income to meet payrolls, pay taxes to support government, provide money for plant expansions and pay shareholders. This flow of orders from all over the nation has an important effect in giving economic stability to communities where we operate. So customers for forest products deserve the best of attention—from all of us!

WEYERHAEUSER TIMBER COMPANY

WORKING IN THE PACIFIC NORTHWEST TO CREATE PRODUCTS, PAYROLLS AND PROFITS

TO HELP INSURE A PERMANENT INDUSTRY WE—

- OPERATE TREE FARMS**—to provide a never ending timber supply for our mills. The forest crop is harvested, reseeded, harvested, reseeded—in about 80-year cycles.
- DIVERSIFY OUR MANUFACTURING**—in order to use all of the tree. The aim is to build manufacturing centers in each of our operating areas so that on one millsite we can make useful products from low value as well as high value material.
- DEVELOP NEW PRODUCTS**—to increase the "take" from each acre of forest land harvested. A staff of engineers and scientists spends all of its time in this work. More products mean more steady jobs.
- DEVELOP PERMANENT MARKETS**—to be reasonably certain that Weyerhaeuser products are in steady demand year in and year out, in good times and bad. We work toward consistent high quality, and apply modern selling methods to create customer demand.
