How To Build Chicken Feeder That Prevents Wasting Food
Our friend "Mr. How" comes up with another handyman's tip - this time for the poultryman. His diagram below shows how chickens have to reach toward the center for grain so they drag less of it over the sides.
It helps get rid of chicken mites, fleas and other blood-sucking vermin such as ticks, spiders and scorpions which weaken poultry, cut down profits.
Call us today for ready-to-use Standard Poultry House Spray. Service is the watchword of our local business.
