YOUTH WINS LAURELS

Gretchen Koosman, an 11th grade student, did what many adults would be proud to do; enter a scientific product and have it carry off a first prize. I thought this unusual, started to investigate and discovered:

Thomas Edison was 22 when he sold his first electrical invention. When Alexander Graham Bell was 24 he discovered a technique to teach deaf children to speak; Marconi was 21 when he made his first successful wireless transmission; The great Railroad Magnate, James J. Hill, was a successful merchant at 18; When Herbert Hoover was 21 he was in charge of his first big mine.

It's the youth in our Country, who are uninhibited with "It can't be done," who have the courage to face obstacles and the industry to see their dream come true. It is youth who will lead our Country to fame and glory.
