Mountain  
States  
Power!

Meet Mr. and Mrs. Bill Brown... owners of Mountain States Power Company.

It's a solid fact that Mountain States Power Company is owned by a lot of people like Mr. and Mrs. Brown — yes, and yourself. People from all walks of life have put some of their savings into electric companies such as ours. They are the direct owners.

But there are countless indirect owners, too. They are people who have savings accounts or life insurance policies... and that means nearly everyone. You are probably one of them.

It works like this: When banks and insurance companies accept your money, they must invest it wisely. Because business-managed electric companies have a long record of successful public service, much of this money is invested in utility securities.

BUICK'S POWER STEERING?  
It's the big NEWS of the year

THERE is a host of things that endear a ROADMASTER to anyone who loves to drive.

There's the might of its Fireball 8 Engine — most powerful ever put in a Buick.

There's the thrill of its Airpower carburetor — a four-barrel automatic that literally brings increased power right out of thin air.

There's its hushed and luxurious silence — its poised and level ride that cost a million dollars to develop — and the infinite smoothness of its Dynaflo Drive.

But the thing that has brought the most cheers for this big and obedient beauty is Buick's version of Power Steering.\*

Gone is the tug of turning, parking, maneuvering in small space.

Power Steering takes over the effort of turning the front wheels — makes it a one-hand operation.

Do you have to learn to drive all over again if you have this new Buick feature?

You definitely do not. On the open road, you have that same sure sense of command that you've always had. Coming out of a curve, you can loosen your grip, and the front wheels right themselves just as they do on every Buick.

But you'll notice this: When you suddenly hit loose dirt or sand — or a stretch of rough road — Power Steering smoothly goes into action — helps take up the jerk — makes control of the wheel easier and driving safer.

Wouldn't you like to try out this newest wonder — on a ROADMASTER or a SUPER? You say the word, and we'll do the rest.

Equipment, accessories, trim and models are subject to change without notice. \*Optional at extra cost on Roadmaster and Super only.
