## MARINE RESERVES COLLECT TOYS FOR NEEDY CHILDREN

Organized Marine Corps reserve units in Montana, Washington, Oregon, and Idaho are now conducting a "TOYS FOR TOTS" campaign as a contribution to the Christmas spirit.

Reservists will collect and distribute these toys on their own time. Such work is not drill time and the reservists will receive no pay. In some locations, the Marines themselves will deliver the toys, using lists furnished by accredited agencies; other units plan to enlist the aid of the local fire department or other agency to aid the underprivileged kids. Where a toy collection program is already a community tradition by another group, the Marines will pitch in and help the already established drive.

## LORANE

Mrs. R. G. Conner, Reporter

One of the happiest boys in the entire valley was Billy Alford Sunday afternoon. Jerry Holland and Larry Parks had gone digger hunting and happened to run across Billy's missing 4-H steer which he had purchased recently at a sale in Corvallis. It had escaped the day after it was brought home.

So far nothing has been seen of Jerry's steer which disappeared at the same time but hopes are high now that it will also be found near where this one was. It was in one of the pastures on the Chester Purdy ranch.

Ten days had gone by since the door to the box stall the calves were in had blown open and they had made their escape.

Rebekahs To Install

Each Rebekah is asked to bring a cake or pie which will be sold following the show. The proceeds of which are also to go to the school.

## Lumber Shipments Hit All-Time High

PORTLAND—West Coast woods are the nation's most sought after lumber species, reports Harris E. Smith, secretary, West Coast Lumbermen's Association, who said this region shipped more lumber in the first ten months of 1952 than for any like period.

Well over a third of all softwood lumber used in America comes from this region west of the Cascade mountains, Smith said. For the first ten months the Douglas fir region shipped 8,781,085,000 board feet, up ten million over last year's record highs. The same mills produced 8,813,783,000 board feet and took orders for 8,635,138,000 feet, the lumber leader pointed out.

Smith predicted Douglas fir mills would intensify selling efforts nationally next year in an effort to maintain high production in face of expected tougher competitive conditions.

## Organized Groups Help CD Campaign

Veterans, civic, women's and farm groups in Oregon are participating in the national "pledge for home defense" campaign during November. Objectives are educating the individual citizen in self-protection and building a list of potential volunteers for local civil defense organizations. Those who register with civil defense will not be called on until the need arises.

"The threat of total war must be met by total preparedness," said Robert Sandstrom of the state civil defense agency. "Civilian and military plans must move together. Civil defense is now a force in being, ready to give at least limited protection to the homefront under attack."

Sandstrom commented that total preparedness might be difficult to achieve, but every person who has learned how to take care of himself and his family during an emergency adds that much more strength to the disaster-relief program.

## MEMORY LANE

Wedge-Shaped Dish  
Remember when cheese, cut by the grocer himself, was sold only in wedge shape? Grandma had a special dish with a wedge-shaped cover to keep her cheese from drying out. Now, it comes in a variety of shapes, packaged to retain its freshness. Grandmother's wedge-shaped dish has become a collector's item. Remember?
