Row River Foresters Club Performs on KVAL 18th

By Mrs. Walter N. Downes
The Row River Foresters club of Mount View, a 4-H club, was on a half hour program, over KVAL-TV on October 18 from 4 to 4:30 p.m.

Those appearing on the program were Jack Gorton, County 4-H club leader; Ted Hudson, the Forestry club leader and a special guest was Harold Sasser, the state farm forester.

Members of the Forestry club taking part were John Snauer, Stephen Gillispie, Carl Hudson and Lyn and Dale Nord.

The boys took part in the show by holding a regular meeting of the club, with the discussions on their activities throughout the year, showing their books and the exhibit boards they took to the fair.

John Snauer and Stephen Gillispie demonstrated the biltmore stick, how to make one and how to use it.

Mr. Sasser then compared the biltmore stick with the regular cruising stick, showing that the boys had made regular professional sticks.

Carl Hudson and Lyn Nord demonstrated the leaf press, the building of one, the use of one and how to operate a leaf press.

Mr. Sasser also showed the boys how their exhibit boards were judged and how to improve them.

Stephen Gillispie was awarded a blue ribbon on his book he exhibited at the Oregon State fair. Mrs. Henry Snauer and Mrs. Glen Gillispie picked the boys up at school and drove them to the television station.

Local Ag Census for '54 Will Begin October 29

Field work in the 1954 Census of Agriculture gets underway locally October 29, when a force of enumerators will start visiting every farm in the area, according to Field Supervisor Don C. Mote of Corvallis, Oregon.

Farm census questionnaires have been mailed to all farm operators. The enumerators will visit all local farms to collect the questionnaires and, if necessary, assist the farmer in filling out the report form.

The 1954 Census of Agriculture is the 16th in a series of nationwide farm enumerations, the first of which was conducted in 1840. The Census of Agriculture is taken at five-year intervals to provide up to date statistical information about more than five million farms which supply food and raw materials for manufacture of goods used by the people of the United States, now numbering about 162.5 million. The current census will yield information on the number and size of farms, acreage and harvest of crops, livestock production and inventories, selected farm facilities and equipment and selected farm expenditures.

Field Supervisor Mote emphasized that all information about individuals and their farm operations furnished to the Census Bureau is held in absolute confidence under Federal law. It is used only to provide summary figures such as totals, averages, and percentages. The information on an individual report cannot be furnished to any one other than sworn Census employees and thus cannot be used for investigation, taxation or regulation.

Friendship must be accompanied with virtue, and always lodged in great and generous minds.

Mexican Display
The 6-2 class had a display about Mexico to which they invited the other sixth grades. They also had a mural in art, and each student told about the picture he had drawn.

One of our eighth grade students, Tommy Harris, left us last week to live in Arkansas. He had been in Jefferson since the sixth grade, and was active in sports.

Our gallant football team has played four games now. They played good football, but somehow lost.

One of our new students in Jefferson is Susan Dougharty, who came to us from Parkdale, Oregon. Her father is the new manager of the Associated Oil Company in Cottage Grove.
