MEMORY Lane

FOURTH OF JULY
Remember when father took you to see the Liberty Bell at Philadelphia, explaining what it stood for? Time has brought many changes but, thank God, our country's most cherished possession—freedom for all, regardless of race or creed—remains the same as when the Liberty Bell rang out so many years ago. Remember?

See that fine fat mountain yonder? You can iron it out, flat as a flounder . . . and easy as whistling! Just point one of Chevrolet's special hill-flatteners at it (either the 162-h.p. "Turbo-Fire V8" or the 180-h.p. "Super Turbo-Fire") . . . and pull the trigger! Barr-r-r-r-o-o-o-oom! Mister, you got you a flat mountain! . . . At least it feels flat. For these Chevrolet V8's gobble up the toughest grades you can ladle out. And holler for more. They love to climb, because that's just about the only time the throttle ever comes near the floorboard. And that's a pity. For here are engines that sing as sweetly as a dynamo . . . built to pour out a torrent of pure, vibrationless power. Big-bore V8's with the shortest stroke in the industry, designed to gulp huge breaths of fresh air and transmute it into blazing acceleration. So most of the time they loaf. Even at the speed limit they just dream along, light and easy as a zephyr, purring out an effortless fraction of their strength. An engineer instantly understands why these V8's are so hyper-efficient . . . how friction is held so low they need just four quarts of oil instead of the usual five or more . . . how big valves let them "breathe" deeply for maximum power. But you don't have to be an engineer to know that these are the sweetest running V8's you ever piloted. Just come in, slip behind the wheel, and point the nose at the nearest hill. These V8's can do their own talking . . . and nobody argues with them!
