

To Our Patrons

In order to conform to the general regulations and the expressed policy of the food administration to conserve in every way possible, to eliminate all extra expense and additional work and to sell all goods as cheaply as it is possible to sell them, and also regulate the collection of our accounts according to the policy which the wholesalers have adopted towards the retailer, it will be necessary for us to collect our bills, in full, at least once every month.

This order will take effect September 1, and we trust that our friends, patrons and customers will feel that this is a patriotic conservation measure and that they will assist us in living up to this order by paying their bills regularly and promptly.

KERR & SILSBY

THE EXAMINATION OF THE EYE

WE RENDER YOU EXPERT SERVICE

The examination of the eye, to be complete, must take into consideration points far deeper than a mere test for vision. Not only do we correct any defect found in the sight, but we also test the strength of the rotary muscles and correct any weakness found there, so that the eyes may work in unison and perform their functions without fatigue.

FITTING FRAMES AND MOUNTINGS

We pay particular attention to fitting frames and mountings so that the glasses will do the utmost good and not detract from the looks of the wearer. Unless the lenses are properly placed before the pupils of the eyes the result will not be satisfactory.

TORICS AND INVISIBLE BIFOCALS

We prescribe Toric or curved lenses in all cases because they allow a wider range of vision, fit closer to the eye and are more becoming. For persons needing glasses for both near and distant vision we supply bifocals which we have fitted with excellent success.
