MILK AS STRENGTH BUILDER ADVOCATED

Dr. Mae Cardwell, Back From Washington, Advises Housewives.

Dr. Mae H. Cardwell, of Portland, who recently returned to Oregon from Gary, Ind., New York and Washington, where she was engaged in medical research work for the Children's Bureau of the Department of Labor, said in an interview: "The dairy industries must be encouraged. The children of America must have milk. They can not thrive without good clean milk. Housewives must use more milk. If they demand it the dairyman will find some solution to his problems and will see that his cows get the feed that he keeps them alive and in good health. However, if the women don't order the milk, the dairyman isn't going to keep his cows around just as pets and ornaments. Feed is too scarce and labor too high for that. It's up to the housekeepers.

"Are you sending your breadwinners to work with all the vigor and strength you can muster for them in the way of proper food?" asks Dr. Cardwell. "If they don't get the right food they can't think or work well. The same applies to the school children. See that they have milk to drink; milk in puddings. The kitchen is the power plant of the family and consequently, of the nation. Don't waste a drop of milk or an ounce of butter, but use plenty. The health of the nation is the kitchen question. Milk is one of the main factors in a diet."

Baby Expert Preaches Greater Use of Milk.

A milk bill and healthy children is cheaper than a doctor's bill and an underfed, under-nourished child. It would be cheaper to start right. So says Mrs. A. Bayley, of the Parents' Educational Bureau, Oregon Congress of Mothers, who has presided at the testing of thousands of babies. She finds the milked youngster of three or four years scores much higher than the child who has had little milk in his diet. Mrs. Bayley preaches a greater use of milk for young and old.

Dairy Commissioner Sees Encouraging Signs.

J. D. Mickie, State Dairy and Food Commissioner, stated recently that the dairy situation, in spite of high prices of feed and scarcity of labor, is not all gloom. Reports have come to him from various parts of the state showing that the housekeepers are beginning to see that they must pay more for milk than they did a few years ago. The dairymen are beginning to take heart, too, in some instances and are looking to the future when the cow of today will be worth much more money alive than she would now, slaughtered. And that future isn't so far off if the dairymen only continue to have courage and patience.

The wise man and the one who is far-seeing, is keeping his herds intact. True, he won't keep the old boaster who would just eat the food and bring no returns, but he is holding his good stock. The sensible housewife, too, must know a man can't feed and care for cows, keep a first class dairy, and provide clean bottles and well paid delivermen without some expense. The Oregon Dairy Council is doing much to get the situation straightened out. The exhibit at the state fair, the splendid cooperation of the Food Administration, the public schools, Oregon Agricultural College and the Bureau of Health, all help the educational work and are part of the great task of "keeping the home fires burning," which task includes the preservation of essential home industries and the health of the nation.

BABIES MUST HAVE MILK

"You get more calories to the penny from milk than from any other food even at the present price," said Dr. E. J. Labbe, specialist, who returned recently from Europe and who spoke at the State Fair and at other patriotic gatherings. Dr. Labbe told of the children he treated in the Red Cross children's hospital in Evian, on Lake Geneva, in France. The little French and Belgian refugees were wan and weak and almost lifeless. A milk diet soon brought good results and the babies thrived. "But," said Dr. Labbe, "they will never entirely shake off the marks made by the months in which they were starved for milk. Children must have milk if the race is to go on. It is every man's and every woman's duty to do all in his power to keep the herds of Oregon alive. Feed men, mill men, dairymen, householders, dealers, everyone must co-operate. The babies of the world must be saved."

Milk may be used not only as an addition to an already rich diet, but in place of some of the slowly digested dishes which over tax the digestive organs and impair the health. Milk contains all the elements necessary to sustain life and build up the body. It must be remembered, too, that butter is a food for all, for rich and poor, for old and young. Cottage cheese is another dairy product that is of great food value.

Some Good Advice

Strengthened by Cottage Grove Experiment.

Kidney disease is too dangerous to neglect. At the first sign of backache, headache, dizziness or urinary disorders, you should give the weakened kidneys prompt attention. Eat little meat, take things easier and use a reliable kidney tonic. There's no other kidney medicine so well recommended as Doan's Kidney Pills. Cottage Grove people rely on them. Here's one of the many statements from Cottage Grove people.
 D. C. Hubbard, retired farmer, 640 Sixth street, Cottage Grove, says: "I have used Doan's Kidney Pills off and on for the past ten years. When ever I have noticed that my kidneys were not acting properly, I have used Doan's Kidney Pills and they have soon put them in good working order. It is Doan's Kidney Pills that are responsible for my present good health."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Hubbard uses. Foster-Milburn Co., Mfgs., Buffalo, N. Y. n15-22

Does Your Horse Kick On His FEED?
 A POORLY FED HORSE

reflects discredit on its owner, but the owner gets the worst of the deal because economy in feeding the horse affects its working capacity as well as its appearance. If your horse kicks on his feed you can correct it by buying your feed here, as you get the best quality for the least outlay. Farmers, contractors and horse owners generally know that our feed is always up to the standard.
