refreshments were served by the hostess.

Chas. Conner returned Wednesday from the Beidler brothers' farm at Mount View, where he assisted with the plowing for three weeks.

**HOW TO GET YOUR
CAR OUT OF THE MUD**

A resourceful motorist whose car has been stuck in the mud does not always have to fall back on a pair of mules to get free. For such an emergency the United States Tire company offers some suggestions that have proved valuable.

The first calls for having stored away somewhere in the car a stack of old newspapers.

When the car gets stuck and the wheels refuse to take hold, feed in some of the old papers between the tires and the mud. Usually only a few wheels will begin to grip and the car start forward. This method of handling a difficult situation is so simple and so uniformly successful that every motorist should know of it and carry a pile of old newspapers, unless he is equipped with

Citrus Washing Powder, pkg.....27c
Pearl Shortening, large size pail.....\$2.45

JONES & EATON

Successors to John F. Spray Cottage Grove

some other apparatus for such a contingency.

Here is another method suggested by the United States Tire company: Put the car in low, and if you cannot feed the gas with your foot evenly, so that the wheels will revolve slowly, put your emergency brake on. Do not put it on so that the wheels will not revolve at all, but tightly enough to keep them from revolving rapidly. With the wheels turning slowly, the maximum pull is delivered to them by having the car in low gear, and so long as they turn slowly they get the benefit of the tremendous power.

It is not always wise to fill the hole with stones or bricks, for their rough edges are hard on tires. Small branches of trees are better, as they offer much better tractive space. Should this method fail, quite often a slight push that would not much more than move a baby buggy will furnish just the added amount of power necessary to get the car going.
