Why I
Claim to
Give
Better
Service

I specialize and devote all my time to your eyes. The lenses are ground exactly to your requirements by myself in my own shop.

The testing is done with the latest and most up to date instruments that are made.

I do not rely on subjective tests (as usually is done) but I also use objective test, which must prove out in harmony. No one instrument and no one method is supreme in optometric work.

My methods require more time to make an eye examination but are correct when finished.

It requires time and patience to make a thorough and complete test of each muscle and refraction.

My method is the scientific drugless application of lenses for the aid of vision and relief of eye strain.
