

TALES OF THE TOWN

W. H. Judson is opening a shop in the 7. G. Walker building, on Main street, for making and repairing furniture.

G. G. Warner has gone to Independence, Ore., to work for the state paving company.

Mrs. Roy Glass and sister, Miss Gustafsen, departed Wednesday morning for Portland, where they will spend most of the summer. Superintendent Glass left Wednesday afternoon for Raymond, Wash., where he will be superintendent of the public schools the coming year. After several weeks spent in transacting school business he will join his family in Portland for the remainder of his vacation.

Mr. and Mrs. Ernest Bisbey left for Portland Wednesday.

Mrs. William Vaughn, of Quincy, Ill., arrived Tuesday for a visit with the family of her brother, John Truax, whom she had not seen for forty years.

The Elmer Harvey family left here Wednesday for Umatilla county, Mrs. Harvey and son Alva going to Athol, by train, and Mr. Harvey and the other son, Oren, driving their team.

Mr. and Mrs. W. P. Huff returned Saturday evening from a three weeks' visit in Wasco county.

A. W. Wampole was in town from Leona Wednesday on business.

Emerson Keithley arrived Wednesday from The Dalles to transact business in this vicinity.

Wm. George went to the Musick mines in the Bohemia district Wednesday to manage the telephone lines. Mrs. George will follow the first of July to have charge of the lookout station. At present the snow is so deep that they have to go in with pack horses.

Bob Jones, who has been over from Reedsport this week, leaves today for Portland in company with Ward Birg, and both will go to Reedsport Monday.

Miss Fern Holcomb spent the weekend with Mrs. N. Hughes at Junction City.

Ray Ciphers is running the new donkey engine at the Garetson sawmill.

Mrs. H. H. Quimby went to Wanaconda, Wash., Wednesday to visit her daughter, Mrs. Melvin Thompson.

Mrs. J. Culver, of Grants Pass, arrived Wednesday to visit her son Harry and family.

H. G. Bowling, of Rice Hill, made a business trip to Cottage Grove Wednesday.

The Cottage Grove baseball club will play Springfield Saturday and Sunday.

John Gray returned from Salem Wednesday.

Harvey Holderman was down from Rujada Wednesday.

W. L. Mabie and family went to Oakland Wednesday to attend his aunt, Mrs. Mary Mabie, who is very ill.

A marriage license was obtained Tuesday by Samuel D. King and Anna L. Sharp, both of Lorane.

B. K. Lawson is in the city for a few days.

Mrs. John Groves is on the sick list this week.

Mr. and Mrs. Sherman Forsythe and Mrs. Lucy Lovelace arrived Thursday from Idaho to visit at the S. L. Churchill home.

Thomas Patten is home from Mills City. His broken arm is healing nicely.

Cecil Caldwell has purchased a new player-piano from Knowles & Graber.

C. H. Shinn made a business trip to Salem Wednesday.

Mrs. C. A. Finley went Thursday to Hood River, where she will make her home.

Eighth grade examinations are being held at the West Side school house yesterday.

Do you pay money for advertising?

If so, First Read These Points

A level-headed business man advertises for business, not for sentiment or pleasure. If this is not his motive, why advertise at all?

The actual cash value of advertising space in any medium is based on two factors, viz: the EXTENT and QUALITY of that medium's circulation.

If it be an established fact that the readers of a paper are almost exclusively of that class that constitutes the regular or probable buyers of your grade of goods, then, manifestly, the only question in determining the value of space is that of the extent of circulation.

That The Cottage Grove Sentinel covers the Cottage Grove country like a mother Hubbard is admitted by both friends and foes. If you have anything that you wish to sell to any class of people in the Cottage Grove country, if you have a message of any kind that you wish to carry to the people of the Cottage Grove country, there is no more certain way of doing so than through the columns of The Sentinel, and the cost, per person reached, is very small.

Cottage Grove Sentinel
THE LIVE WIRE NEWSPAPER

C. E. Aldrich left Wednesday to spend the summer at Walla Walla.

E. J. Howe returned Wednesday from Southern Oregon. He reports much rain in that region.

Miss Maud Humphrey, who has been visiting Mrs. W. B. Hawley, returned to Eugene Thursday.

SOCIETY.

Mrs. Chas. Adams entertained charmingly on the afternoon of May 31st, in honor of Mr. Adams' mother and sister, Mrs. James Adams and Mrs. Louis Mock, who had been her house-guests. About twenty-five matrons of the older and younger sets enjoyed an afternoon of pleasant conversation and needle-work. In a game of "Literary Chess" the honors were won by Mrs. Herbert Eakin and Mrs. F. A. Garelson, who were each presented with a bouquet of choice roses. Delicious refreshments were served by the hostess, assisted by Mrs. Mock.

The "Twenty-Five Club" held their monthly meeting at Odd Fellows' hall Monday evening. Games and refreshments were enjoyed.

Mrs. Leon DesLarzes, who was hostess to the M. P. G. Club Tuesday afternoon, invited as additional guests Miss Louise Garetson, Mrs. B. K. Lawson, Mrs. Claude Kem, Mrs. M. F. DesLarzes, and Mrs. Hiram Griggs. A delicious two-course lunch was served at the close of the afternoon.

The Ladies' Aid Society of the Presbyterian church was pleasantly entertained at the home of Mrs. J. P. Curran Wednesday afternoon. Mrs. Gowdy was assistant hostess.

The Epworth League, after their regular business meeting Monday evening, enjoyed a social hour and served refreshments in honor of Miss Thelma and Miss Helen Breedlove, who will leave this week for their new home in Washington.

A number of the members of the Methodist church pleasantly surprised Mrs. H. B. Breedlove Thursday night after the prayer meeting, by presenting her with a handsome aluminum percolator. Mrs. Breedlove is departing to make her home in Washington, and will be greatly missed by her associates in the church, who have appreciated her activity in the various organizations and her faithful service in the church.

The engagement has been announced of Miss Ruth Jorgenson to Earl Garoutte, the wedding to take place some time in the fall. Miss Jorgenson, who graduated from the high school this year, is the younger daughter of Mr. and Mrs. Henry Jorgenson, of this city, and Mr. Garoutte is the youngest son of Mark Garoutte, foreman of the Western Lumber & Export company. Both young people are popular members of the younger set.

Stone Age Theory Disproved.
The means of manufacture at the disposal of savages were so small that archeologists were formerly of opinion that a stone ax must be the product of the efforts not merely of one generation but of several, being handed down from father to son, and taking shape gradually, so that an implement begun by an individual might be finished by his grandchild.

That this idea is pure nonsense was proved by the late J. D. McGuire of the United States bureau of ethnology, who, developing a high expertise in such work, made first-class axes in a day or two, chipping them out of hard stone and polishing them by rubbing with sand and water. He even produced sculptures in relief after the pattern of those of ancient Mexico, using no other tools than stone hammers for "pecking" at the rock.

Charm and Distinction.
Though the Hopi Indians are rated by Powell as of the same linguistic stock as the Shoshone, Ute and Comanche, it is known definitely that they are a composite people, with a language in which are found Tanoan, Piman and Keresan words. The Snake clan came from the North, possibly from the same stock as that which once peopled the great Mesa Verde rock houses. The Bear clan came from the eastward, undoubtedly of the people from which came the later-day settlements of the upper Rio Grande valley in New Mexico. Most interesting from a local point of view is the determination that the Water House (Patki) and Squash (Patun) clans came from the southward, from "the cactus country."

Sea Caterpillars.

The caterpillars you war against when whitewashing your fruit trees are not the only caterpillars. Caterpillars populate the ocean in billions, and grow into crabs if the Greenland whale does not eat them first.

They are minute little things, about the size of salt grains. As children roll before they walk, so crab-caterpillars begin by literally looping the loop from one spot to another.

Greenland whales like them on account of their diminutive size. Having no teeth and very small throats, the whales find them the most convenient form of diet. They with their mouth open, squirt out the water, and then swallow.

WORLD'S GREAT NEED OF TIN

War Has Diminished Supply of Indispensable Metal, and So Immensely Increased Its Cost.

Probably no market has been more vitally affected by the war and less subject to control than the tin market. It is not really an American industry, for an insignificant amount of tin is produced in the United States as compared with the total consumed. This country is almost absolutely dependent on foreign sources for its supplies. But the metal is a vital necessity at all times and in many directions. It is particularly a war metal in that its use is essential in producing tinplate for food and other containers and for bearings for machinery.

In no other metal has such complete chaos developed as in tin as a result of war conditions. It is the only metal which is exempt from price fixing by our own government, because about 99 per cent of our consumption comes from foreign countries, where its production and sale are controlled by foreign interests. Only its distribution here has been regulated as a war measure.

One of the largest importers has recently said that it would probably be a long time before 60-cent tin would again be seen. Before the war the metal was selling at a little over 30 cents a pound in New York. It has advanced by leaps and bounds until a month ago the New York price was nominal at over \$1 a pound, with the future shipments from the east up to 95 cents—both unheard of heights. This has been caused by the fact that the world's output of tin has not been enough. In fact, statistics show that in recent years this has been at about a standstill.

FORTUNE VANISHED IN NIGHT

American Citizen Tells of His Experience in Mexico, Well Called Land of Revolutions.

The experiences of an American citizen in revolution-racked Mexico, in which between two suns he fell from a position of wealth and affluence to poverty, are told by W. A. King, importer of snakes and wild animals from that cactus country. Widely known as the "Snake King," he makes his headquarters in Brownsville, Tex., where he is prominent in Masonic circles. He was in Washington a few days ago on business with the federal government.

"I lived for a number of years in Mexico," he said, "and am one of the Americans who can really appreciate the genuine freedom of our nation. I had a unique experience there just before Pershing invaded that country on his hunt for Villa.

"I was in that section dominated by the Villa bandits and anarchists. I had in my personal possession more than 300,000 of the Villa pesos, and from the point of view of the Mexicans that sum of money made me a millionaire of influence.

"I went to bed one night with my wealth strapped around me in a money belt. I awakened the next morning and found that a military and political break had taken place between Villa and Carranza and I was a pauper.

"The 300,000 in pesos were worthless. I did not have the price of a cup of coffee."

The Extreme Penalty.

George, the colored porter, was telling about a negro gambling club.

"It shuh is some place, dat is," commented George.

"Any tough colored gamblers ever there?"

"No suh, no tough buhds, only nice gen'men."

"Any of the boys ever get rough?"

"Oh, no suh, not much."

"Any ever pull a razor on you?"

"No, not on dis baby."

"In one did, some real tough fellow, what would you do?"

"Tuhn dat man right ovah to de law."

"And supposing that he would cut you all up, just hack you to bits, what would you do then?"

"In dat case dat man wud be bahd frum de club aftah dat!"

Helping Food Administrator.

One industrious war-gardener is pictured as working busily and reflecting on the virtue of raising his own food supply.

"If everybody grew his own vegetables and ate less meat," he soliloquized, "we'd put old Bill on the bum in a hurry. This is tough work, but I'll stick to it if it kills me. I'm with Hoover on this."

At this point a fine assortment of earthworms was unearthed. The digger's reflections immediately shifted to a shady stream and the final scene shows him happily fishing.

"Oh, well," he reflects to soothe his conscience, "vegetables or fish; it's all the same to Mr. Hoover."—War-Garden Guyed.

Valuable Books Found.

In moving Thiel college library at Greenville, Pa., to another building many rare and almost priceless books of Latin and Greek text were found. One book was printed by Zell at Cologne in 1473, a Virgil's Aeneid was printed in 1501 and one in 1508. A history of Rome, printed by Andrew Weicher in 1596 at Frankfurt and a German religious work, printed in 1594, are in a good state of preservation. Among the other volumes is an iron-bound Bible.

HOUSEHOLD HINTS.

A boiled custard with crushed berries added to it after cooking is a delicious dish.

To polish grained wood soak a flannel in a little linseed oil, rub the wood well, then polish with a soft cloth.

To remove wax from cloth hold a red-hot iron within an inch or two of some blotting paper laid on the cloth over the marks.

A large cracker box, such as will be readily furnished by any grocer, will, if covered with a pretty chintz, make a useful and beautiful shirt waist box.

Sew a piece of red flannel on the end of the lamp wicks in the bungalow lamps. This will absorb all foreign substance in the oil and give you a clearer light.

To tell the difference between porcelain and pottery, hold the article to the light. If transparent, it is porcelain. Pottery is opaque and not so hard and white as porcelain.

If there is fruit juice left from canning, boil it low and use it for flavoring sauces; or it may be added to cold water and converted into a refreshing hot weather drink.

When darning stockings use the darning silk. The advantages are a neat piece of work, better wear than results from cotton or wool, and it is not so apt to hurt the foot.

When opening a can of fruit, vegetables, meat, etc., remove the contents at once. It is advisable to open canned goods and allow them to stand in another vessel before serving them.

To clean old jewelry, make a lather of warm soap and add to it a half teaspoonful of sal volatile. Brush the jewelry in this, afterward polishing with an old silk handkerchief or piece of wash leather.

Curtains will hang more evenly if the selvaige is cut from the goods before hemming, as the selvaige, being more tightly woven than the rest of the fabric, hangs more firmly than the rest. This applies to heavy and thin goods alike.

To save the annoyance of scattered crumbs, when putting dry breadcrumbs through the meat grinder, muzzle the whole front of the apparatus with a paper bag—not a crumb escapes.

To remove glass stoppers, wind a soft, stout string around the neck of the bottle twice, and, while someone holds it, draw the string to and fro at great speed. This friction heats and expands the neck, so that the stopper is easily removed.

If too much water is added to vegetables with a sweet juice like string beans, asparagus, peas, corn and celery, they will be watery and tasteless; therefore, cook them in only enough water to prevent them from scorching.

A good way to wash white clothes and one that will not make them yellow is to melt a third bar of soap in two quarts of water with about two tablespoonfuls of kerosene. Melt it in the wash boiler and then add water sufficient to boil the clothes. Boil 20 minutes. Put in the cleanest and whitest first. The clothes will require very little rubbing if rinsed well.

Do not use more than a mere dusting of flour when kneading the bread.

Scatter salt on a carpet when sweeping, and you will not only find it has a cleansing effect, but that it also keeps away moths.

Pungent vegetables like cabbage, cauliflower, turnips and onions should be cooked in a large amount of water and kept uncovered.

If you object to the odor of kerosene oil in wiping off woodwork then wring a cloth out of hot suds as dry as possible and use that. Another good thing to use is cold tea, but only on dark varnished woodwork.

Repair a badly broken stove lining by the following method: First, obtain a board which will fit the part you are to repair. Place board in position so that space between wall of stove and board is width of your lining. In case entire side is to be repaired, place the board against the stove wall at bottom and gradually slant to the proper width at top. Fill the space with small stones to height of your lining. This is similar to height of your lining. This is similar to building a cement wall. Place a brace

CARD OF THANKS.

We wish to express our sincere appreciation for the many kind attentions during the death and burial of our mother, and for the beautiful floral offerings.

J. G. CARPENTER,
U. G. WALKER,
HATTIE A. DERHAM.

Have you a house to rent? Use a Sentinel wanted.

NEW BUTTER WRAP PRICES

On account of another advance in the price of butter parchment, we find the following slight advance in prices necessary:

100 wraps.....\$1.30
Each additional 100 ordered at same time as first 100.....40c

Friday and Saturday Special

A reduction of 20 cents will be made on first hundred on all orders printed on Fridays or Saturdays. Orders may be placed on any day of the week for printing on Friday or Saturday at the reduced price.

COTTAGE GROVE SENTINEL

Arcade Installs High-Class Machine

Patrons of the Arcade Theater will be highly pleased by the latest improvement announced by Manager White. A Deluxe motion picture machine has been purchased and was installed this week. This machine is the latest model, the most highly perfected type on the market. It is noiseless, and produces a steady picture, entirely eliminating the flicker which is so annoying and so conducive to eye-strain. The wait between reels is also abolished, a continuous story being thrown on the screen. Few theaters as small as the Arcade are to be found with this splendid equipment, and "movie fans" are delighted with Mr. White's progressive measures.

against the board to hold firmly. Now mix equal parts of finely sifted coal ashes, common salt and enough water to make a mixture a little heavier than heavy cream, pour this over the stones, pulling board out a trifle so that mixture reaches the bottom. Smooth top off with a small board, patting it level, and let set for one hour. Remove board and same is ready for use. The lining will not be hard, but build your fire. In a few minutes it will be as hard as stone and as good as a new one.

TESTED RECIPES.

Prune and Banana Dessert.

One cup cooked and chopped prunes, one cup chopped walnut meats, four tablespoonfuls flour, one cup corn syrup, one teaspoon baking powder, two eggs. Mix together the eggs well beaten and the syrup. Sift together the flour and baking powder; mix with the nuts and prunes and add to the first mixture. Bake in well greased and floured gem pans half an hour and serve cold with banana and custard sauce.

Tapioca Cream.

One-third cup pearl tapioca, two cups

milk, one egg, one-eighth teaspoon salt, one-half cup corn syrup (dark), one-half teaspoon vanilla. Cook tapioca with the milk in the top of a double boiler until the tapioca is soft and transparent. Beat the yolk of the egg, add salt, syrup and hot milk mixture. Return to the double boiler and cook, stirring until the mixture thickens. Fold in the stiffly beaten white. Cool. Add flavoring. (Two tablespoonfuls granulated tapioca may be substituted for the pearl tapioca.) Yield, six servings.

If your wedding stationery is printed by The Sentinel, you are assured a long and happy married life.

WAR STORIES.

The Sentinel is desirous of receiving from any of those who served in the recent world war any items which might prove of interest to the general public. The Sentinel would be glad to have the opportunity of examining any collection of trophies for the purpose of giving same a story in its columns.

The demand for cars is so great that Fords are being delivered only upon orders definitely placed with Ford agents, and sometimes even then delivery is slow. If you wish a car for use this season, your order should be placed right now. We will be pleased to demonstrate to interested parties at any time.
