Music and Knives

But what has music to do with table knives? Just this:

The best silverware you can get is marked "Sterling"; the best photograph you can get is marked "Pathe."

The Pathe phonograph is different in principle, better in result. The Pathe sapphire ball, a round polished jewel, replaces the old-fashioned steel needles, which cut and gouge the records. No needles to change; no needles to buy; always ready to play. The Pathe plays all makes of records, and plays them better. Every Pathe record is guaranteed to play 1000 times. These are just three of the big Pathe advantages.

But the most important Pathe feature is the tone. The sapphire ball and the all-wood violin tone chamber give the pure clear tone of perfect music. Not a shading is lost; not an expression missed. When you hear a Pathe instrument, you at least realize how perfectly music can be duplicated.

We have selected the Pathe instrument because we know it is best. After a careful investigation and comparison of all makes of phonographs and records, we realized the Pathe superiority. Yet the Pathe costs no more than the ordinary talking machine.

Give your ears a treat. Let us play a jeweled Pathe for you—the phonograph of Sterling quality.
