School Children's Eyes Should Not Be Neglected

The first symptoms of eyestrain should be heeded.

If the eyes were weak during the last term of school, have them examined before entering school this fall.

Often I can help a child escape glasses later.

School Books

In order to be able to make exchanges on school books for the coming term of school it is necessary that we have some idea of how many of each kind of book will be needed. If the districts will let us know within the next 10 days somewhere near what their requirements are likely to be, we will be able to supply them, but if they do not do so, there are likely to be delays of several weeks when school opens. It will be a favor to us to know what is needed and those who want the books will be accommodated by the prompt service which will result.

PATHE

Stands for Something

Yet it is not an abbreviation. It stands for the best there is in phonographs. Pathe means to the phonograph what Sterling means to silverware. The Pathe sapphire ball does away with cutting and gouging of records. Always ready to go. No needles to buy or change. It will play any make of record but the Pathe records themselves are the best and guaranteed for 1000 times.

The most important Pathe feature is the tone produced by the combination of the sapphire ball and the all-wood violin tone chamber. Not a shading is lost, not an expression missed. The reproduction sounds almost like an improvement upon the original.

The Pathe costs no more than others not so good. Come in and let us play a jeweled Pathe for you.
