Making Horses Go Over Cliff Proves a Two-day Job on "The Westerners"

"You can lead a motion picture horse to location—but you can't make a pair of them jump over a cliff!" The answer is "Yes." That is, if you have infinite patience and abundant skill; and you will see pictorial proof in "The Westerners," the photoplay of Stewart Edward White's famous novel at the Arcade theater, Tuesday, January 6. A few seconds will show you the thrilling episode in which a buckboard, a pair of horses and Lafond, the villain, go over a cliff and down, down nearly 200 feet. But you will not see the two days of labor required to accomplish the feat.

Many times in pictures horses have fallen or slid down banks. So many times that at Los Angeles live several highly skilled horsemen, led by Joe Flores and Curly Eagles, who vie with each other in the tricks performed by their falling horses.

One of the cleverest of all the trick horses is a veteran of the pictures called "Kate." Any stunt that is within equine possibilities Kate can do, and repeatedly has done. She will do a wild runaway, apparently frightened to death, dashing away at full speed—until she is out of the camera's eye. Then she goes to cropping grass in a matter-of-fact way until someone gets her in readiness for the next act. She will throw a man and apparently stamp him to death with her hoofs, but in

reality never touch him with her lightning hoofs. So it was Kate that Director Edward Sloman chose, with another clever horse, to take the buckboard over the cliff. No one doubted her ability or willingness to do the stunt. But when the wild dash took place, wise Kate made it realistic to the very brink of the cliff, then took a remarkable whirl and cantered off saving herself, the

other horse and the buckboard from going over. She seemed to think that this was just what was wanted, and was very satisfied over it, repeating it exactly in every one of the countless rehearsals the scene was given.

When she did understand she rebelled. She thought she knew how the scene should be taken, and nothing could get her over the brink of the cliff. After an afternoon had been used in vain attempts, the scene was postponed.

Next morning another horse was with Kate's team mate and the first attempt was completely successful. The buckboard was smashed, but Lafond, the villain, expert in tumbling as a Jap jiu jitsu adept, escaped with a bruise or so, and the horses were not even scratched. But wise Kate, watching the affair from the bottom of a cliff where she waited to appear in another scene, was evidently worried over it all. As the horse wrangler said, "She looked mighty relieved when she sniffed noses with Blaze and Wall-Eye an' saw that Lafond was walkin'!"

Says "It Acts Like Magic"
Gilbert Fleming, 3011 Badlong Av., Los Angeles, Cal., writes: "I have much pleasure in testifying to the very great benefit my family and I have derived from the use of Foley's Honey and Tar. It positively acts like magic, and to my mind there is nothing on the market that can compare with it. Whenever there are any of our household suffering from heavy colds or bad coughs or hoarseness, we at once get a bottle from our local drug store, and after one or two doses obtain instant relief. Your company deserves great credit for such a valuable production and from our own experience we cannot do otherwise but recommend it to our friends and thus we willingly do and will continue to do so."

Are Your Teeth in Bad Shape?

If you have a bad tooth, perhaps what you need is a gold crown to cover it. If some teeth are missing, they can be replaced by what is called bridgework, which means that new teeth are fastened in by attaching them to other natural teeth in your mouth. Or maybe you need artificial plates, which can be made so natural looking that it is not easy to tell them from real teeth.

The best place to have this kind of dental work done is at an office where Registered Dentists use the E. R. Parker System, because these dentists make special arrangements with out-of-town patients, so that fewer visits are required and you don't have to call so often. Prices are always reasonable, and no charge is made for examinations and advice. There are twenty-four E. R. Parker System offices in different cities, the nearest being at
