

This powerful X-Ray machine will take a picture of any part of the body in a fraction of a second (which is absolutely necessary for good work). It is the last word in X-Ray machines. Any part of the body or organ can be examined with it and diseases treated successfully with it. It is especially valuable in the examination and treatment of the stomach, lungs, bones, etc. All interested are invited to call at the Cottage Grove hospital and see the machine and its work. The Cottage Grove Hospital is open to my own patients only.

Respectfully yours,  
DR. WENDT.
