**HAVE YOU AN EXTRA PAIR OF GLASSES** that you can use in case you break the ones you are wearing?

Many of our foresighted patrons have adopted this suggestion to their satisfaction.

The reserve pair enables you to continue with your work without the loss of time necessitated in waiting for repairs and replacement of broken lenses.

This is particularly urgent in the case of KRYPTOKS, the invisible bifocals, because more time and intricate work are required in making these than the ordinary lenses or bifocals.

You will also find it advantageous to have extra pairs of KRYPTOKS for different occasions and uses.
