A CHEERFUL HOME-COMING

Home means comfort and good cheer when there is a CALORIC FURNACE in the basement.

Your slippers, pipe, favorite reading and the CALORIC are a combination that make you forget the howling wind and drifting snow. And how the wife and children appreciate such a home—warm and comfortable in every room.

More than 76,000 satisfied users testify to the splendid success they have had with the

THE ORIGINAL PATENTED PIPELESS FURNACE

This is the furnace which has revolutionized heating. Instead of using numerous pipes and registers, it heats the entire house through only one register. It is therefore easily installed in new or old houses, usually in one day, without interfering with your present heating arrangements.

The CALORIC heats all types of homes up to eighteen rooms, also churches, stores, factories, halls and other buildings. It burns coal, coke, wood, gas or lignite, and, because of special patented features, saves from 1/4 to 1/2 your fuel. The CALORIC is sold under the Monitor Iron-clad Guarantee, which insures the purchaser thorough and economical heat.

DEMOCRATS CONVENE IN SAN FRANCISCO

Display of Wilson's Picture
Starts a Half Hour
Demonstration.

San Francisco.—The Democratic national convention was called to order Monday by J. Bruce Kremer of Butte, Mont., vice-chairman of the Democratic national committee.

An innovation in the opening of the convention was the silencing of the great gathering by a bugle call, instead of the usual pounding with the gavel. A detachment of marines in front of the platform raised the national colors and presented arms, while the band played the "Star Spangled Banner."

Perched high inside the organ in a special gallery a military band played away the time. As the noon hour and the opening time approached the color guard of marines appeared on the platform. A six-foot sergeant with the gleaming folds of a regimental flag in his hand, made a vivid spot of color on the platform. At his side stood the armed non-commissioned officers of the color guard and with them two marine buglers.

Buglers Sound "Attention."

When Vice-Chairman Kremer of the national committee gave the signal, a bugler sounded "Attention." The sharp staccato call rang out over the up of conversation. The first notes of "The Star-Spangled Banner" rang out from the band and the organ together, and as delegates, alternates and spectators and attendants stood in tribute, a monster flag dropped from the ceiling to form a wall of color behind the platform. It obscured the view of the band gallery and organ left, but as it fell the booming tones of the organ rose from behind it, joining with majestic thunder in the national anthem. From floor and galleries delegates and spectators joined in the mighty tones.

Picture Causes Demonstration.

Then came the touch that set off the convention with a wild shout of exaltation. The great flag was gathered slowly upward in its slings and as it rose it uncovered a flag-draped and illuminated portrait of President Wilson placed high against the great pipes of the organ. For a moment there was a breathless pause. Then came the tumult.

It was a half hour before the outburst evoked by a sudden display of the president's portrait could be stilled. Again and again as his name was mentioned the cheers broke out anew to culminate in the shout of approval that adopted and sent to the White House a striking testimony of his party's faith and pride in the man who has led it for seven troublous years.

Gas and Hot Air

You often hear facetious remarks about gas and hot air, but these are two important factors in modern farming. Both are needed to make the Fordson go and the warmer the air the better the gas works, and the better the gas works the better the Fordson works. Haven't you often felt sorry for your team on a hot summer day as they pulled and tugged at a load? No need to feel sorry for a Fordson, for the warmer she gets the easier she does the work.

Perfection's Price In Tire Building

A tire-maker's first problem is to decide how much he can give for the money. This, and every other question in tire building, depends upon policies.

A super-tire, such as The Brunswick, can be made only by a concern which knows well and appreciates that there is nothing exclusive in the tire industry except high standards.

Since 1845 the House of Brunswick has held first place in every line it entered. Brunswick Tires, as more and more motorists come to know them, will certainly be awarded that coveted place held only by the superline.

Motorists who buy one Brunswick usually adopt it for complete equipment. Yet this is not strange, since the first one so completely proves its superiority.

If the name of Brunswick certifies to you, as to most men, an extraordinary tire, at no higher price, would it not be good business to test one or two Brunswick Tires?
