IF YOUR VISION IS BECOMING HAZY and you are not enjoying the full benefit of perfect sight, you owe it to yourself to have your eyes properly attended to at once.

It will surprise you to know what an improvement a pair of suitable and accurately fitted glasses will make in your seeing capacity and in your general health.

Possibly you can use double-range glasses to good advantage. If so, you can wear KRYPTOKS without anybody knowing you are wearing bifocals, because they have no seams. This overcomes the objection that many people have to wearing bifocals.

A personal investigation of our methods will convince you of our ability to satisfy you.
