Mr. and Mrs. J. A. Powell and son Norval motored to London Sunday afternoon.

Household Hints

A safety razor will remove paint from window glass.

Take a man's old shirt and make baby bloomers.

There is economy in buying large fish, as there is less waste.

When spicing jam, add spices just before removing from fire.

Corn, tomatoes and rice make a good stuffing for peppers.

Use cup cake tins when baking lemon pie for lunch boxes.

Tea should always be made with freshly drawn hot tea.

Very young squashes are delicious steamed.

Lemon rinds are excellent for cleaning nickel ornaments.

A length of white olecloth spread on a bed can be used instead of a cutting table.

Never sew at a sewing machine with the light facing you. Let it come from the left.

When the bottom of a cake is badly burned it may be grated off with a nutmeg grater.

In making lemon pies put the lemon juice in last and the mixture will always thicken properly.

When the linings of shoes or slippers are worn through at the heels use adhesive plaster. Cut a piece large enough to cover both sides of heel, warm it a bit and press firmly into place. This also keeps shoes from slipping at the heel.

Pouring medicine into a spoonful of sweet cream will hide its bitter taste, especially if a spoonful of the cream be taken just before the medicine.

Fruit Salad Dressing—Whites of two eggs, half cup sugar, half a lemon. Beat whites till very stiff, add sugar slowly, then lemon juice equally slow. Usually requires 15 minutes' beating, but is excellent and different.

If your wedding stationery is printed by The Sentinel, you are assured a long and happy married life. a29tf

The Whole Secret of A Better Tire

Simply a Matter of the Maker's Policies

This you will realize—once you try a Brunswick—that a super-tire is possible only when the name certifies that the maker is following the highest standards.

For tire making is chiefly a matter of standards and policies—cost plus care. Any maker can build a good tire if he cares to pay perfection's price.

All men know Brunswick standards, for Brunswick products have been famous for 74 years.

Formulas, fabrics and standards vary vastly in cost. Reinforcements, plies and thickness are a matter of expense. And these variations affect endurance. It rests with the maker how far he wishes to go—how much he can afford to give.

For there are no secrets nor patents to hold one back.

To ascertain what each maker offers one must analyze and test some 200 tires—as our laboratories have done.

Then it is a matter of combining the best features and building according to the highest standards.

Once you try a Brunswick you will understand how we have built model tires, regardless of factory expense.

Yet Brunswick Tires cost you the same as other like-type tires. Our saving is on selling cost, through our nation-wide organization.

We realize that you expect more from Brunswicks, and we assure you that you get it. ONE Brunswick will tell you the story.

And then you'll want ALL Brunswicks. No other tire, you'll agree, gives so much for your money.
