Painless Parker. The Famous Dentist

PEOPLE living a hundred miles or more away come to my offices to have their teeth fixed up. I make it a rule that those from a distance shall be waited upon immediately and their work be completed first, so they can go back home as soon as possible.

Years ago I discovered how to extract and fix teeth without hurting, and was so successful that people called me "Painless" Parker. My practice has grown until I now have

twenty-eight offices, and all my associates in these offices have been taught how to practice painless dentistry as well as I can do it myself. We have fixed up the teeth of over a million people, and call our way of practicing "the E. R. Parker System."
