OAN president

A Clackamas Community College horticulture teacher was installed as the newly-elected president of the Oregon Association of Nurserymen (OAN) at the convention this past week in Eugene.

Edward Schultz, owner of Calorwash Nursery at Aurora, is a graduate of Oregon State University in nursery management and received his master degree at Texas A & M in fruit production.

Schultz, who served this past year as first vice president of the OAN has also served as president of OAN's Clackamas Chapter and the former Rose City Chapter. He is also active in the International Plant Propagators and an avid mountain climber. He was one of a party which climbed Mexico's Mt. Popocatepetl this year. Mt. Popocatepetl is 17,887 feet high, the fourth highest peak in North America.

Other officers installed include first vice president Irene Burden, co-owner of Hazel Dell Gardens, Canby; second vice president Fred Jeibmann, owner of Jeibmann Greenhouses and Nursery, Portland, and treasurer William J. Curtis, owner of Wil-Chris Acres in Sherwood.

Foundation grants

There are hundreds of foundations with millions of dollars in funds to aid students in meeting the costs of higher education that go untouched each year, according to the director of the American College and University Service Bureau.

The Bureau has started a service to aid students, both undergraduates and graduates, in obtaining funds from these foundations.

The Bureau will supply deserving students with the names of foundations and guidance as to how to go about obtaining funds from them.

For more information write: American College and University Service Bureau, Dept. S, 1728-5050 Poplar Ave., Memphis, Tenn. 38157.

Science library

A chemistry library consisting of over 300 texts, some of which have been termed "priceless" by chemistry instructor Loren Studer, were recently donated to Clackamas Community College Science Center by Dr. James Ferguson, retired organic chemistry instructor from Portland State University.

Ferguson is a resident of Milwaukie and said he feels an affinity for CCC, which was formed when he attended open houses here in the past and became a close friend of Studer.

Studer said the gifts will be available in the Orchard complex for daily use, according to the wishes of Ferguson.

Included in the collection are books containing historical data which would be virtually impossible to locate, said Studer.

Blood drawing

The Bloodmobile will return to the Community Center mall on Oct. 26. Blood drawings will be received from 10 a.m. to 2 p.m.

The donated blood goes to the Pacific Northwest Red Cross Blood Program in Portland. It is then supplied to the various medical facilities to be used for blood needs including car accident victims and open heart surgery — a major priority that often takes eight to 16 units of blood per person.

"The commitment is to have three blood drives a year during fall, winter and spring terms. Our goal is to go over the 100 mark for units each time. Our record so far is 113 units of blood," said Bonnie Hartley, CCC's nurse.

Anyone 18 to 62 years old can give blood if they meet the health regulations. People are excluded if they have had hepatitis, or have a fever, cold or hay fever. Also excluded are people who have taken immunization shots in the last 24 hours, pregnant women, and surgical patients who received blood in the previous six months.

Defense seminar

Personal defense and home security will be the subject of Clackamas Community College's Community Services workshop on Nov. 15 at 2 p.m. in CC 117.

CCC's Community Services is offering a seminar to help people learn how to protect themselves and their families against rapist, vandals and burglars.

Roi Hakinson, a rape victim advocate, will be conducting the personal safety part of the seminar.

Clackamas County Sheriff officer Jerry Greene will instruct people on how to make houses burglar proof and discuss residential burglary. Greene will be using two slide presentations to help illustrate his talk. One will be about residential home awareness and the second will concern farms.

The film "Vulnerable to Attack" will also be shown.

Pre-registration is required, call Community Services for more information at 656-2631, ext. 232.

Landscape design

The Community Education Department at Clackamas Community College is sponsoring an eight-week class to help those who wish to landscape their property with an eye toward attracting wildlife.

The class, which will be taught by Gerry Herrmann, director of the John Inskeep Environmental Learning Center at CCC, include such things as the basic needs of wildlife and how to provide them in suburban and rural situation, plan development, design and layout procedures for home and properties, propagation and nurturing wildlife through nest boxes, bird houses and other features, plant studies and identification of Oregon natives and relevant ornamental plants, and field trips to areas of environmental interest.

The class will meet from 9 a.m. to noon on Saturdays starting Oct. 15 at the Center at CCC. For more information call 656-2631, ext. 352 or Marcia Balch, ext. 311.

No school

There will be no classes held at Clackamas Community College for students tomorrow, Oct. 14. The CCC faculty will be engaged in a faculty development in-service day. Classes will resume again Monday, Oct. 17.

Audio system

The John Inskeep Environmental Learning Center at Clackamas Community College is putting a Station Instructional System on the one-mile of trail throughout the complex.

The S.I.S. provides 19 audio information units at key locations around the center. The system will have taped ecology messages which will run from 1 to 3 minutes.

"KYXI radio station has donated 500 tape cartridges that will be used in the system," said Jerry Herrmann, project director. "These tapes will be changed seasonally and plans are being made to have them recorded by the video technician students at CCC."

There are two stages to the complex. The first three steps of stage one are site planning, landscaping, and construction of minor buildings and bridges. Completion of the S.I.S., the fourth step, will make the center complete and functional.

In the future, the fifth and sixth steps, which make up the second stage, will be completed. These are not necessary to the function of the center, but will add to the potential enjoyment. They include a solar heating pavilion, a recycling center which has already been started, and a fish research station.

The American Revolutionary Commission of Oregon granted the project \$2,100 in June of 1976. One-half of this amount was raised on one month's notice by Herrmann to secure the awarded grant.

The S.I.S. will be completed this fall. The wiring and building is finished.
