

# Former carpenter carves life-size figure

Carving a lifesize human figure out of Douglas fir log is not an easy task, but Clackamas Community College student Jim Reid is ready to tackle it.

Reid was formerly a carpenter, but due to an arm injury he can no longer continue that profession. He is currently attending CCC and hopes to retrain for another profession.

In sculpture class Reid made a plaster figure of a man praying and he now plans to carve a replica of that figure out of a 6' 5" log.

"Being a carpenter I like working with wood," said Reid.

Reid hopes to have the log completely finished by summer term and plans to display it in churches and then sell it.

"Without Les Tipton and all my other teachers I would not have accomplished as much or accomplished as well what I have done," said Reid.

Reid plans to hollow the log out once it is finished to make it easier to transport. The finished figure will also have detachable arms. Some of the initial log cuts will have to be made with a small chain saw.

Reid said the piece of art will eventually have a title and may be displayed on campus for a short time.
