

College to honor disabled

by Angela Wilson
Business Manager

Today is Disabled Awareness Day, and there are a variety of presentations to help the disabled and people who aren't disabled to learn more about disabilities.

There will be wheelchair maneuvering demonstrations, vision loss/limited demonstrations, sign language demonstrations, video and slide presentations, and

"We want to help people become comfortable with the disabled and to reduce anxiety about associating or relating with the disabled."

career information for people interested in working with the disabled. All demonstrations and presentations will take place in the Community Center building.

"I encourage students to come and be open to learning about disabilities," said David Campbell, counselor.

The purpose of today's activities is to "raise consciousness of students who shy away from the disabled and disabled issues."

"We want to help people become comfortable with the dis-

JEFF GATES - Will give a presentation in honor of Handicapped Awareness day, today.

abled, and to reduce anxiety about associating or relating with the disabled," Campbell said.

There will also be a tour of the High Tech Center. The High Tech Center was developed for disabled students so they can "become competitive in college and prepare for employment." It is set up so that disabled students can use computer and commercial

software and develop job training skills.

"Disability is not a barrier," Campbell said.

"We need to understand that most of us will be disabled in our lifetime, either temporarily or permanently," Campbell said. "It increases the way we learn to adapt to changing life situations."

thank you!

I would like to thank all of the students who participated in last week's election. I hope that I will see you all back next year. Good luck on your spring term finals.

Herrmann testifies on recycling bills

by Briane C. Dotson
News Editor

"The subject of recycling is the issue of the late 80's and 90's," said Jerry Herrmann of the Environmental Learning Center about the eighteen bills currently in legislator concerning recycling issues.

One of these bills is House Bill 3482 which would establish a resource conservation trust fund. This fund would be separate from the general fund.

This trust fund would authorize DEQ to sell \$300,000 in revenue bonds. Half of these monies will be used for parks, natural areas, nongame and endangered species habitats. The other half will go to provide economic incentives through waste diversion credits to recyclers, waste collectors and processors of waste materials.

Other funds will be given to develop ways to market recycled products and conservation programs.

There are currently thirty representatives and seventeen senators which are in support of house bill 3482. Representative Larry Sowa (D) of Oregon City and Senator Joyce Cohen of Lake Oswego.

Some of the supporters of House Bill 3482 are the John Inskeep Environmental Learning Center; Gage Industries, a plastic manufacture in Lake Oswego,

Clackamas County; and the Oregon Plastic Industries Public Affairs Committee.

Supporters of House Bill 3482 reason for supporting this bill are that it will bring plastic products into the recycling system and provides economic incentives to establish effective recycling programs which do not depend on a market which may fluctuate.

Another of the eighteen bills which is currently being debated is Senate bill 990 which would ban the use of polystyrene.

Herrmann is trying to get the bill amended so that instead of banning styrofoam making it biodegradable meaning that it would disintegrate with in a set amount of time.

"I think business is starting to realize that the products which would replace polystyrene would be just as bad," said Herrmann.

For example the plastic rings which hold six-packs together would be made so it would photobio-degrade within a hundred and twenty days.

"Animals become entangled with the six-pack rings and the rings fragmenting would put an end to this problem," said Herrmann.

Herrmann does not feel that an out and out ban on polystyrene is the right answer, but that developing a way to recycle to polystyrene is.

Haynes featured at mystery festival

Former editor of the Clackamas Community College Print, J. Dana (Conrad) Haynes, is one of six mystery writers featured at a day-long work shop on May 13, from 9 a.m. to 5 p.m. at Norse Hall 111 NE 11th Street in Portland.

Haynes has written three books; "Bishop's Gambit Declined," "Perpetual Check," and "The Poison Position."

Other writers who are scheduled to attend are: K.W. Jester author of twelve novels, Gabrielle Kraft, author of four mysteries, Phil Margolin, Mark Schorr author of nine books, and Bob Zimmer, who is a criminal de-

fense investigator and author.

This work shop is designed for those who write mysteries and would like tips and advice on how to put suspense in their writing.

This session includes instruction on building suspense, creating characters, developing a plot, editing and revising, and tips on how to polish up your crime scene writing.

Registration is \$50 for members of Willamette Writers, and \$65 for non-members. Preregistration is required. For more information call Willamette Writers at 233-1877.

Editorial staff positions available!

Tuition waivers available for the editors of the 1989-90 staff of "The Clackamas Print"
