

usually capture a bird.

Field Station Naturalists

...nd Craters there were
...er cones which are among
...in the state. The area was
...arren and lacked plant life.
...a few, small, scrubby plants
...found in the lava rock.

...ccording to Misley, the
...owers were quite scarce.
...was probably because we
...just a bit early and also
...se of the lack of precipita-
...which is needed to bring
...the flowers." He then added
...number of wildflowers were
...ved in the area between
...st base of the Cascades
...end.

...There were balsam root (a
...sunflower-like daisy),
...s phlox, big head clover,
...desert parsley blooming
...said Misley.

...he group stayed in the dor-
...es at the Field Station. The
...er was rather brisk and cool
...intermittent sunshine and

...On Saturday we even had a
...ry light snow showers,
...none of it stuck," added

...Overall, we had a great time.
...roup was small enough to
...one van, thus we all got
...quainted with each other."
