Student to work in Switzerland over summer for study abroad

For a college student who has not traveled farther than Mexico and Canada, visiting a European country alone can be an exciting and paramount life experience.

Tim Kauffman, a second-year Clackamas Community College student, is traveling to Steim am Rhein, Switzerland this June.

Kauffman will have just completed his second year of German under German instructor Magdalena Ladd.

As a part of the International Education Program, students who

Europe alone by train until the end of September when he is scheduled to return to the U.S. A few of his stops include Berlin to see what is left of the Wall, more towns in West Germany, Austria, France, "and possibly Spain," said Kauffman. "It's a good time to visit Europe, West Germany, and Switzerland because of all the social changes happening now," stated Kauffman. "It's very exciting, I have always wanted to travel abroad, and this was the way to do it."

German instructor Magdalena Ladd helped him get in contact

with the IEP and also helped him coordinate his trip.

"[Ladd] took care of my application and gave me all of the information about the program," explained Kauffman. "She was a real inspiration."

Kauffman seems excited, but cool about leaving for Switzerland June 13. He explains he is not very worried about his German-speaking abilities. What he is frightened of most is missing his International flights or losing his passport...or both.

"It's a good time to visit West Germany because of all the social changes that are happening now."

choose to travel abroad can get college credit and work in a foreign country as a work-study type program. Upon acceptance and placement, the IEP finds four to five jobs available in a student's requested area in which the final choice is then chosen individually.

Kauffman decided between working at a West German airport or a farm, as a waiter in a resort/restaurant, or as a produce worker in a grocery store.

Kauffman finally chose the grocery store job in that, according to Kauffman, is not unlike the Pacific Northwest's Fred Meyer stores. The store "Migros" is home to the small Northeast Switzerland village of about 2,000 people. Kauffman says he will most likely ride the bus to his new-found job.

"I chose the work at 'Migros' because in doing so I get to live with a host family rather than living in a student dorm if I had taken any of the other jobs," explained Kauffman. "It's only for two months, until September 1, but I'll make about 12 Swiss francs an hour." (Equivalent to around \$8 an hour.)

After finishing work at Migros, Kauffman plans to tour Western
