

"The burden of paying Trojan's heavy decommissioning costs should be paid by PGE's shareholders, not by ratepayers who have already paid too much for PGE's reckless nuclear venture.

The Trojan nuclear power plant should be closed this year! Allowing this costly nuclear lemon to run for four more years will only generate more radioactive waste and pose a continued safety hazard.

PGE's desperate effort to delay should be rejected.

The sooner this atomic power plant is closed, the sooner Oregon can move on to a sustainable energy future."
