Painting Exhibit

The work of Ann Shiogi will be on display in the Pauling Gallery through Dec. 10. Shiogi has done oil and wax on hemp paintings, and four drawings.

"What you see is the residue of wheels moving through dirt and probably pigeon guano and some wheat paste mixed with graphite," Shiogi said. "The drawings were cut down, laminated to rice paper and made into scrolls which I felt was consistent with the lifestyle and methodology of the draftsman."

Assemblage Sculpture

Theresa Mistretta's assemblage sculpture and acrylic paintings can be seen at the Family Resource Center through Nov. 30.

Student Art Display

Oil and acrylic paintings by students of David Andersen are displayed in the McLoughlin Hall Theater lobby.

Hollywood promises a scary Christmas

Sigourney Weaver, Winona Ryder and Ryder's gun-wielding companion battle unruly aliens. ...For the fourth time.

Move over Sigourney...Winona's here!

Movie: *Alien Resurrection*

Release Date: Nov. 26

Rating: R

Bottom Line: Looks like a great show, but for Thanksgiving?

Alien Resurrection is the fourth installment in the line of *Alien* movies. Starring Sigourney Weaver, Winona Ryder, and the ever-ferocious aliens, *Resurrection* promises thrills, chills, and quality kills. Weaver, who is now living and with a full head of hair thanks to amazing DNA technology, battles a stowaway alien with "Little Woman" turned-buff mechanic Ryder. The newborn alien raises quite a stink for the two husky women who obviously do more than change its diapers. This movie actually shows some promise, so if you enjoyed the alien carnage of the previous three movies, go and see it.

Look out Sigourney...Bond never dies!

Movie: *Tomorrow Never Dies*

Release Date: Dec. 19

Rating: PG-13

Bottom line: Bombs, blondes, and BOND!

Tomorrow Never Dies is the 18th Bond movie, and looks like it will become a hit at the box office. Pierce Brosnan, who previously starred as the famous secret agent in *Goldeneye*, is back to rid the world of evil. In *Tomorrow Never Dies*, Bond is the one man who can stop Elliot Carver, a corrupt television magnate from making the news rather than reporting it. And, in this case, this means that Carver has the power to become a catalyst in an international incident. Expect many of 007's usual hijinks: Bombs, explosions, steamy love scenes and secret documents.

Bombs, blonds and Bond! The 18th Bond movie looks to become a success, following in the footsteps of Goldeneye.

Mortal Kombat Annihilation appears to be just another mindless movie filled with violence. So, the American public ought to love it.

Sigourney, run! Here comes Rayden!

Movie: *Mortal Kombat - Annihilation*

Release Date: Already in theatres

Rating: PG-13

Bottom line: Brainless action movie with many fights.

The gang is back in the sequel to *Mortal Kombat*, the smash-em-up fighting movie of 1996. But this time, no one is playing by the rules. The evil annihilation forces are taking over the world, and only Sonja, Lu Kang, and the rest of the "good guys" have the power to stop them. *Annihilation* basically has the same thoughtless plot as the first movie (good vs. evil, good wins), and the acting is just as sub-par. Even in lieu of this fact, many people will want to see it, because of the hype and hoopla surrounding both of the movies and video games. But there is one small twist: One of the good guys dies!
