What is Ticket-in/Ticket-out?

by Kelly Mason, Slot Manager

It has come to my attention that not everyone is aware of what ticket-in/ticket-out machines are.

Ticket-in/ticket-out machines (TITO) produce a bar-coded ticket that's the size of a bill and can be inserted into any TITO machine's bill validator.

Once the ticket is placed inside the machine, the guest instantly is issued the appropriate amount of credits on the machine. This feature greatly enhances the transferability of play from machine to machine, which has been the major drawback of ticket machines.

TITO machines are marked by a green-colored dangler on the top right-hand side of each machine. Currently, we have nearly 250 machines that are TITO-enabled and we are diligently working on acquiring more of them.

Additionally, I am told that we're the only Oregon casino that has TITO machines at this time.

This 1,027-pound pumpkin, which was on display outside next to the casino's front entrance during Halloween, did a good job of slowing the traffic down.
