Time to gather basket materials

The time to gather basket materials is here. Gathering these materials is the necessary first step in our basket-making process.

Hazel sticks (kvn) generally are ready to pick and peel in the middle of spring. Hazel from areas in and around the Willamette Valley generally is ready a couple of weeks earlier than hazel found near the coast.

Many variables help determine the best time to pick hazel. Beginning in April, hazel should be checked to see how easily the bark peels. If hazel is picked too early, the bark won't slip and has to be scraped off. This is labor-intensive and also takes the natural sheen off the sticks.

Hazel is the foundation for most Siletz baskets. When gathering, most people pick a range of sizes, peel them and then grade them for length and diameter. They are then bundled and stored for later use.

Spruce root (xii-wan-tr'e) is the other main material used in our baskets. It can be gathered year round. An area with spruce trees is found and the roots are dug and rolled up. They then are boiled until the outer layer or membrane will slip off. The roots then are graded and stored for later use.

Tribal members interested in learning to gather and process these materials can call Bud Lane in the Siletz Cultural Department at 800-922-1399, ext. 1320, or 541-444-8320; or e-mail budl@ctsi.nsn.us.

Remember, there is a short window for gathering hazel sticks, usually 30 to 40 days depending on weather conditions and other factors.
