Investment in career technical education will expand hands-on learning

PORTLAND, Ore. – In a major expansion of career readiness investment, 140 Oregon middle schools and high schools – serving more than 90,000 students – will receive Career and Technical Education (CTE) Revitalization Grants totaling \$8.87 million, Labor Commissioner Brad Avakian and Deputy Superintendent of Public Instruction Rob Saxton announced Jan. 7.

The CTE Revitalization Grants will benefit students, schools and local employers around the state in fields such as health care, advanced manufacturing, construction, engineering, agriculture, renewable energy technology and more.

“Oregon’s competitiveness is fundamentally linked to the availability of a skilled workforce,” said Avakian. “This is a huge win for students and our ability to support well-paying jobs around the state. Today’s announcement represents the most significant investment in career education and hands-on learning in a generation. More students will have access to 21st century shop classes and applied science, technology, engineering and mathematics instruction as a result.”

Graduation rates for students in CTE programs are near 90 percent, according to the National Association of State Directors of Career Technical Education Consortium.

“As we strive to meet our state’s 40-40-20 goals and better prepare our students for college and career, strong programs in career and technical education are essential,” said Saxton. “This year’s CTE Revitalization Grants will fund hands-on, applied

learning opportunities in 140 schools all around our state and will help more of our students graduate with the skills they will need to succeed in higher education and the workforce.”

The CTE Revitalization Advisory Committee – composed of representatives from organized labor, trade organizations, education and Oregon’s business community – reviewed 62 applications totaling \$21.6 million in requests.

A diverse coalition of advocates will seek to refill the grant fund during the 2014 Oregon legislative session.

The grants build on an earlier investment by the 2011 Legislature to bring back vocational programs to 21 middle schools and high schools with an initial investment of \$2 million (HB 3362). During the 2013 Oregon legislative session, a bipartisan coalition sponsored and passed legislation (SB 498) that quadrupled the initial investment.

The grant advisory committee prioritized geographic diversity and strong community partnerships with local employers in its selection of grants. The 24 funded programs will leverage more than \$2.6 million in matching funds from community and business partners. The business partnerships also ensure that career readiness education matches the greatest need in high-wage, high-growth fields.

One-third of all grant-funded projects are located in non-metropolitan Oregon counties. For more information, visit ode.state.or.us/search/page/?id=4050.
