

Graduates!

Jessyca Downey Univ. of Oregon

Jessyca Downey is from Portland, Ore., and graduated from Sunset High School in Beaverton, Ore., in 2009. She then enrolled at the University of Oregon, majoring in human physiology. She graduated from UO on June 17, 2013, with a bachelor's of science degree.

Jessyca was a model student and maintained a high GPA while attending UO. She is considering a return to the university to enroll in the Sapsik' w ala' (Teacher) Education Project at the College of Education.

Chinook Winds taps Trachsel as director of compliance

Trevor Trachsel has been named director of compliance at Chinook Winds Casino Resort. This move is a natural one as he has been a compliance agent for the Siletz Tribal Gaming Commission since August 2007.

Beginning Dec. 30, he became responsible for ensuring that Chinook Winds is in compliance with gaming regulations and company policies and procedures.

Trachsel received a bachelor's of science degree from the University of Oregon in 1997. He is a Siletz Tribal member and was raised in the Siletz community. He moved back to Siletz in 2002 and still calls it home.

With more than 11 years of experience in the casino industry, Trachsel

brings extensive knowledge of gaming regulation and a collaborative work ethic. With this new position, he can apply his understanding for the necessity of gaming regulation to ensure that Chinook Winds remains in compliance while maximizing profits.

"I'm really excited to bring my skill set and new perspective to this position," said Trachsel when asked about his immediate plans for the future. "Everybody has done an incredible job at making me feel welcome here. It's a true testament to the team concept at Chinook Winds."

"We are excited to have Trevor on board with us. Given his background at the commission, he will truly be an asset to our casino team," said Mike Fisher, general manager of the casino properties.

Our beloved Katherine Porter passed on Jan. 5. Her mother, Connie Hartt (Clemmie), and her entire family truly appreciate the kind offerings that have brought such comfort to us during this very sad time. To the Portland Elders in particular, when that van drove up the driveway it was all we could do to hold it together.

Kathy would have had the biggest smile to know that her Tribal family and friends took the time to come and celebrate her life and memories with us.

Siletz Community Coed Basketball Tournament March 14th, 15th & 16th, 2014 CW Case Memorial Tourney

Research Experience for Undergraduates

Summer 2014

Eco-Informatics Summer Institute

Contemporary careers demand capabilities to integrate technology, theory, and practical knowledge. Develop skills in collaboration and gain hands-on experience in the beautiful old-growth forests and stream ecosystems of the mountains of Oregon.

Work in teams to explore challenging natural resource management problems, extensive databases and complex ecosystem models, and new technologies for measuring ecosystems.

Interact with other talented students to explore botany, climate science, computer science, ecology, engineering, fisheries, forestry, mathematics, statistics, water resources, zoology, and many others.

Come discover Oregon and be part of the emerging science of ecoinformatics!

Questions? Contact Baek Soo "Peggy" Lee, EISI Program Manager, at leeb@onid.orst.edu

WHO: Undergraduate students from all over the US.

WHAT: Summer institute experience, stipend, and housing provided.

WHEN: June 16th – early August, 2014.

APPLICATION DEADLINE: February 15th, 2014.

WHERE: HJ Andrews Experimental Forest on the McKenzie River and at OSU in Corvallis, OR.

WEBSITE: <http://eco-informatics.engr.oregonstate.edu>

"EISI provides an excellent opportunity to add to the legacy of the HJ Andrews Experimental Forest with innovative ecoinformatics research. Living and working at the Andrews provides a spring board right into the heart of the Oregon Cascades." --EISI, 2008 Participant
