

*THANKS FOR YOUR PATIENCE...
OUR NORTHWEST THEMED LANDSCAPING PROJECT IS DONE
AND THE BEARS HAVE FINALLY ARRIVED!*

"The Northwest Theme (Rock, Post & Beam) has been gaining momentum in downtown Cave Junction, we hope that our project will inspire a continuation of this city-wide theme."

—Brady Adams, President, Evergreen Federal Bank

*O*n September 20th, Evergreen completed its Cave Junction office landscape project with the public unveiling of two life-sized black bear bronze monuments. The bronze bears have been permanently mounted next to a water feature complete with a new northwest themed time and temperature sign.

The bronze bears were created by artist Peter Sedlow, to make a statement about the natural beauty of the area and will become a major addition of public art for the Illinois Valley. *The Northwest Theme (Rock, Post & Beam)* has been gaining momentum in downtown Cave Junction, we hope that our project will inspire a continuation of this city-wide theme. If visitors to our community slow down and say, "Wow, this must be a great place to live," we feel we have accomplished our goal.

In addition to Peter Sedlow, many other talented people were involved in the landscape project. Ron Padget and his team at Harmony Gardens Landscape built the waterfalls; Bob Eding drew the color designs for the project; Western Signs designed and built the signs; and Dave Adams, a local builder/designer, oversaw the entire project.

Brady Adams
