Do the bright thing

Pacific Power wants to help you use electricity wisely. When your home is energy-efficient, you can save money and be more comfortable. Get started with these simple tips:

- When cooler weather hits, set your thermostat between 65° and 68°F, if your health permits. Each degree you lower your thermostat can save up to 3 percent on your bill.
- Don't block heating registers, baseboards, radiators or cold air returns. Air has to circulate for your heating system to work efficiently.
- Put compact fluorescent bulbs in light fixtures that are heavily used. These bulbs use one-quarter the energy and last 10 times as long.
- Install energy-efficient showerheads and faucet aerators. They can save on hot water, and the newest models deliver excellent water pressure.
- Look for the Energy Star® label when buying new appliances. You'll save money on energy costs and help protect the environment by using less energy.

Our *Bright Ideas* booklet is filled with more energy-wise tips. For your copy, visit www.pacificpower.net or call 1-888-221-7070.
