Page 16

Smoke alarms vital to arrest death by fire

An average of three children a day die in hom fires.

And according to th National Fire Protection Association, half of al fatal home fires occur i the small number of home without working smok detectors.

Non-working smok detectors rob residents o the protective benefit home fire safety device were designed to provide The most commonly cited cause of non-workin smoke detectors: worn o missing batteries.

Changing smoke de tector batteries at least once a year is one of th simplest, most effectiv ways to reduce these tragi deaths and injuries.

In fact, working smok detectors nearly cut in hal the risk of dying in a hom fire. Additionally, the In ternational Association of Fire Chiefs recommend replacing smoke detector every 10 years.

"The peak time fo home fire fatalities is be tween 10 p.m. and 6 a.m when most families ar sleeping," said Scott Wil liams, fire prevention spe cialist. "Smoke detecto maintenance is a simple effective way to reduc home fire deaths."
