Included in the list of priority projects provided by Civil West are pipeline rehab, manhole repair, aerobic digester aerator upgrades, an RV dump station and bulk water station upgrades, among others.

The estimated costs for wastewater system upgrades and household water system upgrades are \$3,080,500 and \$3,416,400, respectively. As this is far more than the city has in its coffers, Boger suggested that the city seek grant funding through an organization called Business Oregon, which brings different granting organizations together for what he called "a one-stop funding meeting." At such a meeting "a few agencies can come together and provide a better package than anyone could by themselves" said Boger.

The council then passed a resolution authorizing city staff and the mayor to initiate the search for capital funding. According to the wording of the resolution, city staff is now authorized

to "seek the most funding available that is in the best interest of the city of Cave Junction." This resolution does not obligate the city to any specific funding package or dollar amount, but just allows them to start shopping around. Any potential funding packages, whether they are grants or loans, would come back to the council for discussion and approval. The amount of funding available will determine how and when the projects are undertaken.

The council also voted to authorize the County Treasurer to include the city in the Josephine County Investment Program. This is a program in which the County Treasurer invests the city's tax revenue until it is needed by the city. According to Mayor Daniel Dalegowski, the city takes part in this program every year.

There was then a brief discussion of the proposed I.V. by Candlelight event, a reprise of last year's candlelight walk in support of public safety. Councilor Jean Ann Miles, who is one of the event organizers, was seeking city approval for the event. As the event is still in the planning stages, Miles did not have all

of the details that the council requested. The discussion was tabled until the next meeting. I.V. by Candlelight is scheduled for Aug. 3 after the Concert in the Park at Jubilee Park.

During the public comment period at the end of the meeting, and the closing comments from the council, multiple people voiced their approval of Deputy Gerald Bayard, the contract deputy who is currently serving the Cave Junction area. They also praised the Josephine County Sheriff's Department for its cooperation with local public safety groups. Burglaries in the Cave Junction area were down over the last month, a fact that Bayard attributed to this increased cooperation. Councilor Lindsey Gillette proposed drafting a letter to the sheriff expressing the peoples' pleasure with their deputy.

The Cave Junction City Council meets the second Monday of the month, with additional meetings scheduled as needed. The next meeting is July 24. Meetings are held at 7 p.m. at City Hall, located at 222 W Lister Street. The public is always welcome.

"We've noticed some beautiful gravel deposits where some of the salmon redds are being put down."

A redd is a depression in the gravel that the female salmon makes with her tail, then lays her egg and then covers with other gravels.

"There's all kinds of science around how she picks out the areas," said O'Brien. "What she's wanting for her little ones is, there has to be enough oxygen, not stagnant water, enough nutrients in the water. Mama salmon is able in some way to sense that this is a good spot, where it's going to be protected a little

bit." Slowing down the flows in Grayback, O'Brien added, will also tend to slow down Sucker Creek because of lower flows heading downstream.

The cost of the project cost is about \$38,000, of which \$10,000 comes from lottery funds and the rest from the U.S. Forest Service. The Forest Service is also providing the wood. The weeklong project is using contractors for the labor, and O'Brien noted that this brings dollars into our local community.

Also in the works this summer by the Watershed Council is the Dunn Creek project. This will be a remodel of a large wood "legacy" project dating from the 1990s.
