

The U.S.S.R. has enough multi-megaton nuclear warheads to bomb the U.S.A. every hour, every day, for a year (or 175 bombs in each state) and use less than half of it's supply. The U.S.A. could bomb the U.S.S.R. with half our supply for almost two years!

Why have we allowed our governments to build over 50,000 nuclear warheads?

Our right to vote in this country seems limited to what issues the government allows us to vote on. To be represented we must cast our vote now and as often as necessary by writing letters of protest demanding a halt to the production (now 12 bombs a day), a reduction of and a disarmament of all nuclear warheads.

Our freedom to propose laws, protest and vote are tools we have and must use to maneuver our representatives and our policies toward the survival of the human being.
