UNIQUE FEATURE OF THE APPROACHING REPUBLICAN NATIONAL CONVENTION IN CHICAGO

614 of the total number of 685 of the delegates come from states having direct primaries.

This is to be the first National Convention held by any political party wherein a majority of the delegates come from states having primaries for the purpose of instructing delegates and expressing their preference for President of the United States. This state was the pioneer in advocating direct primaries and preferential vote. Instead of being "freak legislation" it has been adopted by most of the Northern states, the convention system still prevailing in the solid South. The Republican party in Oregon now confronts the question: "Shall her delegates to the National Convention obey the wish

of the people as expressed in the primaries or shall they be sent un-instructed and delegated to do the thinking for the Republican party of the State of Oregon?" thus the Oregon System is on trial.

"The choice of Oregon Republican voters will receive my undivided support" is the platform of David E. Lofgren, candidate for delegate to the Republican National Convention from the Third Congressional District, comprising Multnomah County. Lofgren was the first candidate from this district to announce himself unequivocally in favor of the man receiving the highest number of votes at the primaries May 19th. He favors planks in the Republican platform declaring for National Equal Suffrage, Revision of Tariff by Commission, and a Budget System in the business of the government. His number on the ballot is 30.

Most attractive feature about an auction is that it is partially a game of chance.

RE-ELECT Congressman C. N. McArthur

It was last December that he was seated. He is making good. Give him a more thorough test.

McArthur has played fair with labor, as his vote in the Legislature in 1909 and 1913 will prove.

He supported the act establishing the Industrial Welfare Commission, one of the most important pieces of legislation ever written in the statutes of Oregon.

He supported the act creating the State Industrial Accident Commission, commonly known as the "Workman's Compensation Act."

He supported an act declaring the public policy of the state relating to the wages of workers, fixing maximum hours and providing extra pay for overtime.

He supported the "headlight" and "full crew" bills which the railroad boys wanted.

He supported a bill requiring transportation companies to file with the State Railroad Commission the names and addresses of witnesses to accidents.

He supported the bill prohibiting the hiring of inexperienced boys to do the work that men should do in operating elevators.

These are some things which show that McArthur is fair to labor. Even in the five months he has been in Congress he has helped when he could.

Re-elect Congressman McArthur and give him a thorough test.
