

AMERICORPS

By now, with all the publicity there has been about Americorps, everyone knows what great things have been accomplished around Town. At the Community Hall, the upstairs ceiling has been completed, the awning over the entry doors has been completed, **and some REALLY great news, the Hall is now open!** Also, the workers have laid the ceramic tile on the floors of the park restrooms.

This Americorps crew is a new one, so stop by and say hello. They are now working on the fence around the perimeter of Town under the direction of Mayor Alvin Thompson, who says, "They are working right along." Hopefully this will keep the range cows out of town so gardens and lawns will be safe again. Other projects that are planned for these young people are to fix the soffits at the library, finish the sidewalk through the park, repair the top rail around the tennis court, and at City Hall, they will be installing new ceiling tile, remodeling the bathroom and building display cabinets.

It is indeed a gratifying experience to work with these people. As always they are doing a fantastic job.
