ODYSSEY OF THE MIND

Five Butte Falls Elementary students competed against 2,000 students from all over Oregon on the OSU Campus early in April. The students competed in two problems. One was a long term problem called Scientific Safari. They titled this, Recycled Park. With a car made from an old wagon and animals constructed from paper mache, the students were required to "tag" and move all of their game animals from the "wild" to their "camp" by using their car. The car was required to have two different power sources. This problem had to be completed in 7 minutes. The students were judged on their problem solving techniques. Butte Falls finished 7th in the State in this event. In a second contest, a spontaneous problem, they were put in a room and given a problem. They had only a few minutes to find their solution. The team won an award for creativity in this event. This award is considered one of the highest awards possible in Odyssey of the Mind. **CONGRATULATIONS to Brandon VanVeldhulzen, Shannon Sizemore, Elizabeth McLaughlin, Amanda Newby, Gretchen Mallory** and also to the helpers, **Maggy Harrington** and **Cathy Harrington** and **Coach Sherry Sipple**.
