HOT SPOT

On Tuesday, May 20th our Fire Department responded to a mobile home fire at 331 Fee Street. For the first time we were equipped with a generator so that we had lights. It was also the first structure fire that Ruthe McCaw, Mike Blake, Tim Shaw and Shannon Wright had attended. Thanks to the training and commitment of our volunteers, we were able to knock down the fire and prevent the building burning to the ground as most mobile homes do when subjected to fire.

Thanks to the citizens who supplied us with drinking water, and helped us to open the hydrant and operate the pump until more firefighters arrived.

This shows that more firefighters are needed to give our town an adequate degree of protection during daylight hours. Meetings are held at the fire hall twice a month (every other Tuesday).

Let us all continue to work to be fire-safe in our community! *Ruthe McCaw*

HAVE A GOOD SUMMER!

The only thing that can be achieved without effort is failure

TODDLER PLAYGROUND

Have you noticed? We have started on the playground! Patty Shafer is the coordinator for getting the project completed and she has spent many hours on the phone and driving to Medford to check out supplies and equipment that will be needed. Our next step is getting the concrete, sand and chips put in. Still needed is the loan of a long trailer for hauling lumber and a dump truck and loader to move 65 yards of sand that is being donated by the Forest Service from their pit. Some of our play equipment has arrived and we are hoping to get our project completed by July 4th. Volunteers who can help are encouraged to call Patty. She says she needs all the help she can get!

Many thanks to all the fine people who made the Fun Walk/Run Bake Sale a large success. A total of \$171.90 was raised.
