Tool Glossary

Hammer: Originally employed as a weapon of war, the hammer nowadays is used as a kind of divining rod to locate the most expensive parts adjacent to the object we are trying to hit. Also used as replacement for screwdriver.

Belt Sander: An electric sanding tool commonly used to convert minor touch-up jobs into major refinishing jobs.

Earl the Snowman was trying to get his buddy, Bob to go diving with him. But Bob was too smart for Earl. He knew, with no legs and only one stick arm he couldn't dive, he would only 'bob' in the water. He had a better idea. He said, "It's hot out here, let's go to the beach."
