

Hello

My name is Fred Phillips, and I am running for Mayor of Butte Falls and thought it would be a good idea to share my life experiences with you and let you decide if I am qualified for this job.

I graduated from the University of Portland in 1960 with a Bachelor of Science degree in General Engineering. From 1960 to 1980 I worked for the United States Forest Service, except for a short period working for the U. S. Army Corps of Engineers in the early 1960's. I worked on several eastern Oregon National Forests and spent 10 years working on the Rogue River N. F. over all four ranger districts including Butte Falls.

In December of 1980 I went into business for myself in Medford as Fred Phillips Engineering. I worked full time in this business until about 2008 and continued to work on a part time basis since then. I truly enjoy my profession and wish to continue doing it on a semi-retired basis for as long as I can. My work as a civil engineer included designing roads, small bridges, campgrounds, subdivisions, and buildings of all types; Residential, Commercial and Industrial.

I have also been active in volunteer organizations most of my adult life, which included; Planning Commissions in Medford, School Boards at Sacred Heart and Saint Mary's, and Habitat For Humanity/ Rogue Valley. I also spent a few years on the Butte Falls Planning Commission. I am currently serving on the Butte Falls School District Budget Committee.

I have five children and eleven grandchildren that I stay in touch with and share holidays with. I am the oldest of eleven children and our family reunions are sometimes bigger than some of the small towns I have lived in.

I moved up here from Medford in 2004, and like it, and have no desire to live anywhere else.

If elected I will do my best to serve this community and will solicit volunteers who may want a piece of the pie.

Thank you for your consideration.

Sincerely

Fred Phillips
