

In Robotics class we build and create programs for the Lego Mindstorms EV3 Robots so that it do all kinds of things. For example we made Sumo Bots last year with the basic bot that had to push the other robot out of a ring. After we competed once we were able to put any kind of attachments to help our bot win. Another example of a project from last was making Race Bots. These bots had to go in a straight line and had to be faster than our opponent. Just like the other competition after we went once, we were able to make adjustments to our car so that it would go straighter and faster. Some people chose to re-gear it their bot, others tried to make it lighter, and some tried both. There are many different things that you are able to do with an EV3 robot. You can build just about anything your mind can think of. For instance, last year a couple students made a Stair Climber and a Rubik Cube solver. The Rubik Cube solver solved a Rubik Cube by using a color sensors to match up the sides. There are a ton of thing you can build with these EV3 robot kits. So if you like playing with Legos and doing some programing then you will really enjoy this class, I know I do.

Five things I like about Butte Falls

By Christina Suarez Media Student

Mon. Oct 17th, 2016

First, I like almost all the teachers that are at Butte Falls. They are very nice and they are very helpful. Secondly, I like how Mr. Sixta grades our papers with exceeds, meets and revise. Plus, I appreciate that he always puts side notes to help us figure out how to make our papers better. Thirdly, I like most of the kids in the school. Some of them can be rude at times, but they're okay. Also, I like that we have lockers because you can keep all of your stuff in there instead of keeping it with you all the time. Lastly, I like how Ms. Brown makes funny comments and jokes. She always makes everyone laugh. There is also one thing that I don't really like about Butte Falls and that is the recent move of the seventh graders to the high school building. Personally, I think that they are too young to be in the high school and it has really made the halls crowded the past few of years.

Congratulations

Working your way through 4 days...

Thursday September 8th, 2016

Haley Sakamoto (New Student)

Did you know that SHFB, is Butte Falls High School backwards? There's many things about the school that might encourage you to get more involved in the town/school. Everyone is friendly and very caring, and respectful to you as a new student. If you need something just ask, odds are you will have people be friendlier than you may think. I like the fact that teachers are easily approachable and are willing to work with you on anything you may need help accomplishing; completing assignments on time or even organization. Sometimes you just need a helping hand, someone to walk you through the steps, and the community here is willing to do that.

Normally as a new student you are quiet, shy or not so talkative, but here at Butte Falls you will get a warm welcome and fit right in. As an upperclassmen walking through the halls and having your teachers saying "how's it going", it's a wonderful feeling. Knowing that you are already becoming a "Logger" on your second week of school, is like a big accomplishment.

Another huge thing that is quite relaxing and laid back, is that for school we always get three day weekends! Whaaat?! Three days? Yeah that may not sound too exciting but when you try to cram a camping trip into a day and a half ...it makes all the difference. You can actually sleep in Saturday morning and not worry about waking up early, because it will set you off track for Monday morning.
