

Butte Falls School District #91

June 12, 2017

Dear Parents and Families of Butte Falls Charter School Students,

As we finish up this remarkable year I want to **thank you for partnering with us in the education of your student.** We have accomplished many things together this year. We are already planning for the coming school year as we look toward **updating our elementary mathematics curriculum and additional resources for secondary science.** We will also be **welcoming several new experienced teachers and expanding of our middle school and high school sports programs** in collaboration with the Crater Lake Charter Academy.

This past weekend we **celebrated the graduation of 14 Butte Falls seniors.** We are very proud of the accomplishments of these students over the past 13 years of school and **look forward to the successes that lie ahead** for them and our current students.

Here are several additional items of interest that relate to this summer:

1. We will be **improving the flooring** in two of our elementary campus classrooms this summer as we clean both campuses from top to bottom. We are also **adding a digital security system** to our elementary campus to help us monitor our campus both during school hours and after hours. The high school currently has such a system. We will also be **upgrading the computers** in our elementary campus computer lab. **Upgrades to our four school buses will include multi-digital camera safety systems.**
2. We will **not be offering our summer meals program this summer.** Instead we will do a **deep cleaning and upgrade of some equipment in our kitchen** this summer so we can be ready for the coming school year. We hope to bring the summer meals program back for the summer of 2018.
3. We had anticipated that significant construction work would be occurring to our high school campus this summer. The district received a grant to strengthen the structure of our academic and gymnasium buildings. Due to a tight construction market, we will be **delaying that seismic construction work** for a year (summer of 2018).
