

4. **Work continues on our Natural Resources Center (NRC . . . the former fish hatchery).** This spring over **12,000 board feet of lumber was milled** at the site. Our high school design and construction technology students have been **designing and building a water wheel, walkways, and bridges** for this site under the guidance of our construction teacher (and NRC manager), Mr. Mathes. We very much appreciate the **support from local businesses, patrons and philanthropic groups** for time, funding, and donations as we develop this element of our instructional program.
5. **We have some employment opportunities** (teaching, coaching, and helping) posted on our website and may have a few more as we finalize our district budget. **If you have interest or know of excellent people who might want to work with our students and staff**, please check at www.buttefalls.k12.or.us (Employment Opportunities).
6. **If you have had any changes in mailing or email addresses or contact numbers**, please let the school office know (541-365-3563). This will allow us to keep in touch over the summer. **Check out our Facebook site (*Butte Falls Charter School*)**, as well.

Finally, we encourage you to **keep your student involved in learning this summer**. The Jackson County Library (with branches in most every town) is a great place to get **audio and print books**. It is also a cool place to be on a hot day! Visit the library website at <http://jcls.org/home>.

Thank you, again, for choosing our school as the partner to help your student learn and grow. Have a terrific and safe summer! **Looking forward to seeing you and your student this fall.**

Sincerely,

Dr. Phil Long, Superintendent
